## **SHORT-TERM PROGRAMMES**

- Central Europe and the Great Powers in the 19<sup>th</sup> and 20<sup>th</sup> Centuries
- Characteristics of the Rise of Modern Hungary in the 19<sup>th</sup> and 20<sup>th</sup> Centuries
- Cold War Studies
- Contextualizing East-Central Europe: Hungary's Cultural Identity
- Cultural Diplomacy: Central Europe and the English-speaking World
- Drama and the Theater: a Practical and Theoretical Approach from a European Perspective
- Ethics and Philosophical Psychology
- Genre and Informational Technology of Avantgarde Literature
- Inditerdisciplinary Researches in the Context of Language
- International Relations and Globalization in the 19<sup>th</sup> and 20<sup>th</sup> Centuries
- Introduction to Russian Studies
- Irish Studies (History, Literature and Culture)
- Language and Mind
- Movie-making
- Nationalism Studies
- The Renaissance in Central Europe (Arts, Literature and Philosophy)
- The World Outside Europe at the Turn of the Millennium

## **Welcome to Eötvös Loránd University**

Eötvös Loránd University (ELTE) - in terms of student and staff number, quality of education and research, its international relations and prestige - is a decisive, elite institution of state higher education in Hungary, which has been operating since 1635.

We are all proud of the fact that the professors and alumni of ELTE have always played a significant role both in Hungarian and international scientific, cultural, and political life.

In an ever-changing Hungarian and international environment the main objective of Eötvös Loránd University is to follow its traditions and at the same time to meet the challenges of modern times and become the regional centre of higher education, research and development in Central Europe. It is extremely important for us to strengthen our position in the European Higher Education and Research Area.

Eötvös Loránd University has extensive relationships with institutions of higher education and international organisations all over the world both in the field of education and research. In order to maintain the high quality of research and education it is essential, however, that ELTE establish an effective partnership not only with institutions of higher education and academic institutions but also with representatives of the Hungarian and international business community.

Eötvös Loránd University is ready to extend its relationships. Only this kind of co-operation can ensure that - preserving its more than three hundred-year-old values - Eötvös Loránd University remains a prominent institution, a landmark in Hungarian and international higher education in the 21st century.

### **PROFESSOR BARNA MEZEY**

Rector

Eötvös Loránd University

## History of ELTE

Eötvös Loránd University is the oldest and largest university of Hungary. It was founded in Nagyszombat (today Trnava, Slovakia) in 1635 by Péter Pázmány, the Archbishop of Esztergom, who entrusted the Jesuit order with the governance of the university. The first two faculties were the Faculty of Theology and the Faculty of Arts, and as early as 1667 the Faculty of Law was opened. The university had the right to award degrees and titles from the very beginning of its existence.

During the 18th century it gradually came under the control of the government, and with the foundation of the Medical Faculty in 1769 it became a classical university with four faculties. After the abolition of the Jesuit order, the university was moved to the Royal Palace in Buda in 1777, in accordance with the original wishes of Péter Pázmány. In 1784, however, it was moved to Pest.

Latin was the language of teaching until 1844. The most intensive period of development started in 1867 after the Austrian-Hungarian Compromise, which resulted in the establishment of the Austro-Hungarian Monarchy. At that time the staff included not only outstanding European lecturers but also world famous scientists. At the turn of the century it was one of the 15 largest universities in the world.

In 1949 the Faculty of Science became independent of the Faculty of Arts, and in 1950 the university adopted the name of Loránd Eötvös (1848-1919), a professor of Physics of international repute (notably for his work on the equivalence of gravitational and internal mass). The planning and building of the campus in Lágymányos (South Buda) started in the mid-eighties and was completed in September 2001. In January 2000 the Bárczi Gusztáv College of Special Education and the College of Primary and Nursery School Teachers' Training were integrated into ELTE. In the course of the structural reorganisation of the university in September 2003, three new faculties were opened: the Faculty of Informatics (which became independent of the Faculty of Science), the Faculty of Education and Psychology (which became independent of the Faculty of Arts) and the Faculty of Social Sciences. The Teacher Training College, which had been part of the university since 1983, was incorporated into the above mentioned faculties.

## History of Budapest

Budapest is often called the "Pearl of the Danube", and it truly is a stunningly beautiful place. Geography, history, and human creativity have all contributed to create a city that simultaneously charms, amazes, and fascinates. Budapest is full of diversity, and so is its history.

The area of the capital has been inhabited for thousands of years. It is known for its Celtic settlements from the 3rd century BC. In the first decades BC Transdanubia was conquered by the Romans, who incorporated it into the Roman Empire under the name of Pannonia. Aquincum (now Óbuda) developed into the capital of Pannonia, and it became an important station along the limes.

After the Roman withdrawal, it was first controlled by the Huns, then by Eastern Goths, Longobards and Avars. From the 8th century it was inhabited by Slavic tribes, vassals of the Franks.

The Hungarians appeared here in the late 9th century. They established their first settlements on the island of Csepel and in Aquincum.

The new settlers built a centre on both sides of the River. Interestingly, both parts came collectively to be known as Pest. Some researchers say that the word is of Slavic origin, meaning stove or kiln, and refers to the natural warm springs found on and near Gellért Hill. The Royal Charter dating from 1232 appears to back this up. The name Buda came somewhat later, during the reign of King Béla IV. When Hungary was invaded and devastated by the Mongols (1241-1242), King Béla ordered new castles and fortresses to be built all around the country. He provided a good example, for he built the first Royal Palace in Buda (from that time on known as Castle Hill). It was also he who, in a gold-sealed letter of 1244, conferred privileges on the towns, which enabled them to develop agriculture and trade. Buda became the royal seat around the turn of the 15th century under the rule of Sigismund of Luxembourg, and the Royal Palace grew ever larger until its zenith was reached under King Matthias (ruled 1458-1490). Pest also prospered at this time, and Matthias raised it to equal rank with Buda. In between the two, contemporary records show that Margaret Island was home not only to several monasteries but also to a castle built by the crusaders. Following the Hungarian defeat at the Battle of Mohács (1526) the Turks sacked and burned Buda. Pest and Óbuda, too, suffered dreadfully as a result of the Turkish rule that followed for a century and a half. The Turks did, however, build baths fed by the hot springs. Their cupolas appear on contemporary engravings, and of course some of them are still extant today - the most visible legacy of that period.

Buda was freed from Turkish rule in 1686, and so began the next period of development. Many places outside the capital gained the right to hold markets, and there were social developments as well. A printing press was established in Buda by 1724, and in 1777 Empress Maria Theresa had the country's university (the predecessor of Eötvös Loránd University) moved here from Nagyszombat (today Trnava in Slovakia), bringing with it an influx of learned tutors and youthful students.

Emperor Joseph II later switched it from Buda to Pest, a move which promoted a big growth in Hungarian-language, literature and in due course, theatre, because up until that time the dominant language of culture in Buda had been German. The Hungarian Academy of Sciences, the Kisfaludy Society, and the National Theatre together played a pivotal role in the social development of the city. This was also the age when newspapers started, among them the ground-breaking Pesti Hírlap founded by Lajos Kossuth.

The next challenge was the building of the first permanent bridge over the River Danube - the Chain Bridge, today still the most recognisable symbol of the city - and the logical conclusion of that was the legislative unification of Buda, Pest and Óbuda in 1873 into one city - Budapest. A Council of Public Works was formed, whose direction determined both the future shape and the enduring beauty of the city. The great boulevards were laid down - most notably Andrásy út and the körútak or ring roads - and the transformation of Budapest into a modern world class city truly began. There was an even greater impetus at the end of the nineteenth century as Hungary celebrated the millenary anniversary of the Hungarian Conquest. The first continental underground railway was built, the streets were paved, street lighting was introduced, the waterworks at Káposztásmegyer was constructed (it is still in operation today), and a public sewerage system was developed. The first trams appeared.

The political Compromise between Hungary and Austria in 1867 led to the beginning of the industrialisation of Budapest. Agricultural industries, milling and food industries all moved into the capital, and engineering industries grew. The railways were built, and, as the major roads, they all radiate out from Budapest. Budapest itself did not suffer particularly in the First World War, so after a brief halt, the process of development resumed. As the city continued to grow, neighbouring suburbs were absorbed into four new administrative districts. The Second World War, however, had a catastrophic effect. Apart from the horrifying cost in terms of human lives, the architectural splendour of the city was brought to ruins. Each of the bridges over the River Danube was blown up by the retreating Germans. These the authorities managed to replace within four years, as work to rebuild the city progressed very quickly. There was a further administrative enlargement in 1950 when more neighbouring towns were absorbed; the city now comprised 22 districts (more recently this has become 23, as boundaries have been redrawn). The buildings and transport network of the city suffered afresh in the 1956 Uprising, but were again repaired. Large-scale building of blocks of flats took place in the 1960's, followed by the construction of two new underground lines. The Lágymányosi Bridge, the new National Theatre, and the National Concert Hall have all appeared after the fall of Communism. There are many further developments planned, including a fourth underground line.

## Service Units/Extracurricular Activities

Study and research are supported by the university library network, the operation of which is coordinated by the renowned **University Library** founded in 1561, making it the oldest standing library in Hungary. Today the holdings of the University Library amount to 2 million titles, over 200,000 journals, 600 online periodicals, and 100 databases on the internet. There is also a direct link to the online catalogues of the Central Library of the University of Miskolc and of Semmelweis University. In addition to the traditional library services, members are given access to e-text archives, online copies of printed documents, electronic-only materials, and CD-ROMs.

People seeking to escape from all the studying may want to visit the **Botanical Garden**. After becoming world famous soon after its establishment, it was moved to its current premises, more than 150 years ago. It became a national reserve in 1960, and nowadays boasts about 7000 species and variations of plants. The orangery and the greenhouse are the home of the tropical and sub-tropical plants, with the cactus, bromeliad and orchid collections being especially rich. The arboretum with its 800 species of trees and bushes and 500 types of floral plants is also worth visiting. Nowadays the main aims of the Botanical Garden are to develop and maintain the collection, preserve and artificially multiply endangered species, and also to support botanical and conservationist education.

If interested in everything China, be sure to visit the **Confucius Institute** of Eötvös Loránd University, which was established on 7 December 2006 and was the first in Hungary and in fact the Central European region. The first Confucius Institute was established in November 2004 in Korea, and since then 80 such institutes have opened in 36 countries worldwide. The establishment of a global network of Confucius Institutes aims at propagating Chinese language and culture, training personnel with a good knowledge of China, and helping China develop its relations with other countries. The activities of these institutes include providing Chinese language courses, organising the Chinese Proficiency Test (HSK) in Hungary, giving home to cultural events such as concerts, exhibitions, conferences, and movie presentations, and supporting the publishing of books and other materials.

The **Biological and Palaeontological Museum** is located in South Buda in the new building of the Lágymányos Campus Faculty of Science under an imposing pyramid dome and is sure to attract many with an interest for the history of nature on Earth. This university collection - which is unique in Hungary - demonstrates the evolution of mankind and the fauna with the relevant palaeontological materials, full body products, and anatomy. The new exhibition was reopened in 2002, after the Second World War ravaged the former collection. The main hall contains rocks full of fossils, while on the ground floor in huge exhibition cases several animal groups are exhibited. Their palaeontological materials and the skeletons of existing species are displayed in an evolutionary order. The most important publications and old textbooks are exhibited on the first floor. The gallery contains exhibition cases with stuffed birds, mammals, and the artefacts and instruments of anthropology.

The **Mineral and Rock Collection** was established in 1774. It is the oldest scientific artefact collection of the university and the biggest such collection in

Hungary. At the end of the 18th century it was the biggest systematized educational purpose collection in Europe. The Collection contains about 1000 mineral types and almost all rock types can be found here. The Collection assists not only the training of geology, environment, chemistry, and history of science students and researchers of the University, but also secondary school children from around Hungary

Other exhibitions such as the Mineral Taxonomy, Meteorite Collection, and the Periodic Table of Elements Exhibition are also well worth visiting along with temporary exhibitions of guest exhibitors. The Collection has been open to the public since the 2006/2007 academic year.

Musical types should acquaint themselves with the Eötvös Art Ensemble, which consists of three groups:

- the Béla Bartók University Choir
- the University Orchestra
- the University Folk Dance Ensemble

The **Eötvös Art Ensemble** is led by Kovács László Ferenc Liszt Prize winner. The Choir has participated in more than 40 international tours and has won several awards at international competitions and festivals. They regularly perform works of Zoltán Kodály and Béla Bartók but their repertoire also features renaissance and baroque composers.

The Folk Ensemble was founded in 1957 and today is led by Gábor Valach. The repertoire of the Folk Dance Ensemble includes a wide range of folk dances of the ethnic groups living in the Carpathian Basin. The Ensemble is a prestigious member of the amateur folk dance movement, and was qualified Gold Grade at the last nationwide qualification. It consists of two groups, the so-called new generation and the senior group.

## **Student Services**

In order to make foreign students settle in quickly and more easily to make their experience as good as possible, ELTE operates a **mentor system**.

The scheme allocates a native student to the foreign student, thereby acquainting them with each other and ensuring that the new candidate from abroad enjoys the benefits of being guided by a senior student who knows their way around the campus and understands the whole of the education and its processes at ELTE. It is important to note that students are paired up before the start of the semester. Hence, not only will the incoming student be fully prepared for studying at ELTE, but they will also be assisted in getting accommodation (e.g., student residence halls, rent-a-flat assistance), doing the necessary paperwork, and socialising with locals on cultural and social programmes.

## **Career Service Centre**

The ELTE Senate created the Career Service Centre on 1 October 2007 for two reasons. Firstly, it was intended to help students learn practical skills during their training. ELTE understands the importance of such skills and as the labour market seeks more and more versatile and skilled people, the need to give students the edge over others who only receive theoretical knowledge grew to the extent where the creation of the centre was highly desirable. Secondly, as the centre ensures that ELTE students learn practical skills via specially designed courses and programmes in an attempt to help them find work during and after their studies, it also results in the increased value of an ELTE degree. Consequently, graduates gain an even bigger advantage since the reputation of their degree is at a constant rise.

The ELTE Alumni Club was created in 2007 in an attempt to bring the graduates of ELTE closer. It caters for current and former professors, researchers, and administrative staff, as well as former students. It was designed to create a place where the people of ELTE may get in touch with each other. It may serve people who want to reminisce and also those who seek career opportunities from the connections with the fellow people of ELTE. The club has enjoyed great success since its beginning and continues to make belonging to ELTE mean belonging to a community of people who share values, goals, as well as their past.

### **Alumni-Club for former and current Exchange and visiting students**

The ELTE Alumni Club was created in 2007 in an attempt to bring the graduates of ELTE closer. It caters for current and former professors, researchers, and administrative staff, as well as former students. It was designed to create a place where the people of ELTE may get in touch with each other. It may serve people who want to reminisce and also those who seek career opportunities from the connections with the fellow people of ELTE. The club has enjoyed great success since its beginning and continues to make belonging to ELTE mean belonging to a community of people who share values, goals, as well as their past.

### **International Opportunities**

Eötvös Loránd University has extensive relationships with formal agreements for co-operation and exchange with **400 universities** in Europe, Asia, Africa, North and South America at an institutional or faculty level. The main areas of co-operation are joint training and research projects, joint participation in international conferences and workshops, accreditation of courses, and also the exchange of students and guest professors. ELTE is proud to be able to present its students and staff the possibility to visit other countries and cultures in order to broaden their worldview and increase their cultural awareness, and continues to sustain its international connections for the benefit of both Hungarian and foreign students and staff.

- [Physics](#)

## PRE-UNIVERSITY PROGRAMME IN HUMANITIES

**Name of the programme:** English and American Studies

**Level of the programme:** BA

**Length of the programme:** 8 semesters (2 of semesters of preparatory studies 6 semesters of BA studies)

**ECTS Credits:** 180

**Language of the programme:** English

**Place of the programme:** Trefort Campus

**Start date of the programme:** 5 Sept 2012 – June/July 2016

**Organizational unit of Eötvös Loránd University:** Faculty of Humanities, School of English and American Studies (SEAS)

### Short description of the programme:

Preparatory studies (one year): this foundation programme has been designed for students who wish to undertake further studies at ELTE or any other European university, but do not yet have the necessary level of language competence, study skills, and cultural background knowledge to start a BA degree programme.

BA programme (3 years): The School of English and American Studies offers a BA programme in English and American studies. The programme may be completed as a major programme or as a minor programme, the latter of which being available only for students who are in another major programme at ELTE. Students taking the programme as a major opt for either the English or the American track at the end of the first term. The three-year long programme does not provide teaching qualifications, which can be acquired only at the MA level, i.e., with two further years of study.

### Strengths of the programme:

Students in the English studies track within the BA programme at the School of English and American Studies are offered a chance to acquaint themselves with the foundations of information technology and typography in the first phase of their studies. This is followed by a series of seminars and lectures aimed at developing students' competence in using English as a language of global communication, academic writing, and everyday oral argumentation in a scholarly and business environment. Students will thus attain the foundations of academic research, evaluation and critical thinking in English literature, British and American socio-political history, and develop an understanding of the linguistic levels of description and analysis of English (phonology and syntax).

Students opting for the American Studies track within the BA programme in English are given the opportunity to acquaint themselves with the background and idiosyncratic features of American history, culture, literature, and the American variety of English. By focusing on these areas of research, the aim of the American Studies track is to impart the students with

the foundations of critical thinking and academic research in order to prepare them for future studies or for successful endeavours when entering the job market.

### **Career opportunities:**

BA graduates are eligible to work towards their studies for an MA degree in English; MA in English with teaching qualifications or MA in American studies.

### **Requirements:**

For entering the preparatory year:

- recommended level of English: at least A2 level of the CEFR (Common European Framework of Reference), i.e. a minimum of approximately 250 hours of previous studies
- *No language certificate is required and meeting the above requirement is at the applicant's discretion*

For entering the BA programme (or following the successful completion of the preparatory year the student is minimally able to achieve):

- TOEFL PBT (Paper-based test): 500
- TOEFL IBT (Internet-based test): 60
- IELTS (International English Language Testing System): 3.5/4.0/4.5
- CEFR (Common European Framework of Reference): B1

<b>Tuition fee/semester</b>	<b>EU/EEA Students</b>	<b>non EEA Students</b>
	<b>750€</b>	<b>750€</b>

### **Way of application:**

To apply to the programme please contact the student advisor or the programme co-ordinator, listed below. You can find further information about the application and application forms at the following websites.

<http://www.btk.elte.hu/en/BA/foreign>, <http://www.btk.elte.hu/en/Alas-129>

**Application deadline: 20 August 2012**

**Further information can be found at:** <http://seaswiki.elte.hu/studies>

## PRE-UNIVERSITY PROGRAMMES IN INFORMATION TECHNOLOGY

**Name of the programme:** Software Information Technology, Preliminary Year

**Level of the programme:** Pre-university programme

**Length of the programme:** 2 semesters

**Type of the programme:** Full time

**ECTS Credits:** 6 credits

**Language of the programme:** English

**Place of the programme:** Lágymányos Campus

**Start date of the programme:** 5 Sept 2012 – 29 June 2013

**Organizational unit of Eötvös Loránd University:** ELTE Faculty of Informatics

### Short description of the programme:

This program is recommended for future students who want to build a firm basis for their further studies in the BSc program of Software Information Technology or who get their Letter of Admission but could not reach the minimum level in their Entrance Examination in September.

### Strengths of the programme:

The curriculum of the preliminary program is assembled on topics relevant to the BSc program. It includes courses in, mathematics, informatics and English language.

### Career opportunities:

The successfully completed preliminary course is acknowledged by a certificate and automatically ensures admission to the BSc program.

### Requirements:

Those students can apply who have finished a secondary school education (equivalent of a General Certificate of Education [UK] or a high school diploma [US]), or who have completed at least three years of the usual four years of secondary school education (aged 17) in countries where the last year of secondary education is a pre-university program.

<b>Tuition fee/semester</b>	<b>EU/EEA Students</b>	<b>non EEA Students</b>
	<b>2000€</b>	<b>2000€</b>
<b>Other costs</b>		
Registration fee	<b>140€</b>	<b>140€</b>

\*only in the first semester

**Way of application:**

Applicants should send their application material by post to the Faculty or via email attachment to the Program Coordinator

**Application deadline:** April 30, 2012

**PRE-UNIVERSITY PROGRAMMES IN SCIENCE**

**Name of the programme:** Biology

**Level of the programme:** Pre-university programme

**Length of the programme:** 2 semesters

**Language of the programme:** English

**Place of the programme:** Lágymányos Campus

**Start date of the programme:** 5 Sept 2012 –

**Organizational unit of Eötvös Loránd University:** Faculty of Science, Institute of Biology

**Short description of the programme:**

This programme is recommended for future students who want to build a firm basis for their further studies in the B.Sc. and M.Sc. programmes of Eötvös Loránd University. The successfully completed preparatory programme is acknowledged by a certificate and automatically ensures admission into the B.Sc. programme.

**Strengths of the programme:**

The curriculum of the pre-university programme is assembled on topics relevant to the B.Sc. programme. It includes courses in biology, chemistry, physics, and mathematics. The programme is organised in a two-semester form with a ten-week programme in each. The first semester is from the beginning of October to mid-December, and the second semester is from the beginning of February to the beginning of April. A good working knowledge of

English is required. Applicants may apply for a language course to improve their English but the costs of this are not covered by the tuition fee of the Pre-University Programme.

### Requirements:

Students who have finished a secondary school (equivalent of a General Certificate of Education [UK] or a high school diploma [US]) can apply, or who have completed at least three years of the usual four years of secondary school education (aged 17) in countries where the last year of secondary education is a pre-university programme.

<b>Tuition fee/semester</b>	EU/EEA Students	non EEA
Students	1700€	1700€
<b>Other costs</b>		
Application fee	160€	160€
Registration fee	60€	60€

\*No registration fee is charged in the first semester

### Way of application:

To apply to the programme please contact the student advisor or the programme co-ordinator, listed below.

### Scholarships/Discounts:

At present Eötvös Loránd University cannot offer scholarships, however, we give a \*20% fee reduction to our best B.Sc. and M.Sc. biology students\*, from the second year on, determined by their performance in the previous year.

**Name of the programme:** Chemistry

**Level of the programme:** Pre-university programme

**Length of the programme:** 1 or 2 semesters

**Type of the programme:** Full time

**Language of the programme:** English

**Place of the programme:** Lágymányos Campus

**Start date of the programme:** 5 Sept 2012 -

**Organizational unit of Eötvös Loránd University:** Faculty of Science, Institute of Chemistry

**Short description of the programme:**

The two semester form is organised in the first and second semester as ten week programmes each from the beginning of October to the middle of December (first semester) and from the beginning of February till the beginning of April (second semester).

The one semester form is organised as a single 12 week intense programme from the beginning of February till the end of April.

**Career opportunities:**

Successful completion of either type of the pre-university programmes automatically gives the right for admission to start the 6 semester integrated BSc programme.

**Requirements:**

Students with completed secondary school education—having received the equivalent of General Certificate of Education (UK) or high school diploma (US)—or with at least three completed years of the usual four years of secondary school education (aged 17, in countries where the last year of secondary education is a pre-university programme) can apply for the two-semester pre-university programme. The prerequisite of acceptance is a good command of English, and preference for the subjects of Chemistry, Mathematics, and Physics, the subjects of the pre-university programme in this order of importance. An officially attested record of studies from the three or four years of secondary school studies including the following subjects of science: chemistry, physics, and mathematics (written in English) and the secondary school certificate if the studies are already completed at the time of submission.

<b>Tuition fee/semester</b>	<b>EU/EEA Students</b>	<b>non EEA Students</b>
Two semester programme	<b>1200€</b>	<b>1200€</b>
One semester intensive programme	<b>1900€</b>	<b>1900€</b>

## EDUCATION AND PSYCHOLOGY

**Name of the programme:** Psychology

**Level of the programme:** BA

**Length of the programme:** 6 semesters

**Type of the programme:** Full time

**ECTS Credits:** 186

**Language of the programme:** English

**Place of the programme:** IZU (Izabella street) Campus

**Start date of the programme:** 5 Sept 2012 – 4 July 2015

**Organizational unit of Eötvös Loránd University:** Faculty of Education and Psychology,  
Institute of Psychology

### **Short description of the programme:**

The aim of the ELTE psychology BA programme is to train professionals who are perfect in the theoretical foundations and basic methods of psychology, have an insight into the applied branches of psychology, and possess skills and techniques that can be used in order to measure, explore, and develop individuals, groups or organisations through behaviour measurement or other experiments. Students will obtain an integrated knowledge of education, communication, socialisation, learning, and human development.

It is also aimed to provide modern, both theoretical and practical knowledge and a true sense of vocation that supports further learning in any psychology MA.

### **Strengths of the programme:**

The foreign language qualification of ELTE has a long history stemming from the internationally known workshops and the teachers who are also recognised internationally. The English Language University Programmes in Psychology (hereafter: ELUP) exists since 1991, as an English language version of the Hungarian curriculum. During these 19 years the Institute welcomed 50-60 students per year from a wide range of foreign countries.

As one can see, the foreign student to teacher ratio supports a tutorial-like atmosphere which can boost communication and guidance effectiveness among the students and their teachers.

Regarding the number of staff and students, the professional preparedness, administrative capacity, and infrastructural conditions of the institute, the Faculty of Education and Psychology at ELTE is the best Institute of Psychology in Hungary.

### **Career opportunities:**

The activity of a behaviour-analyst can find its grounds and justification in every organisation, field, institute, where the following processes – involving human interventions – take place: education, qualification, development, leadership, recruitment, selection, re-education,

correction, or health activities. Furthermore, a behaviour-analyst can also work in any psychological laboratory and can complete and evaluate several standard experiments and aptitude tests of organisational psychology. Naturally – in specific cases – the supervision of a qualified psychologist is obligatory.

Because a behaviour-analyst is trained and prepared to conduct and analyse several experiments regarding human interventions, like standard or intentional surveys of competence, adaptivity, attitude or functioning, the demand for such professionals can be characterised as significant and remarkable. Institutes that already employ a well-trained and qualified psychologist can also claim new professionals to work under supervision and deepen their competence this way. Thus, the human resources and financial budgets might get better organised and become more productive whilst remaining cost effective – benefiting both employers and employees.

### Requirements:

Certificate of matriculation from a secondary school

<b>Tuition fee/semester</b>	<b>EU/EEA Students</b>	<b>non EEA Students</b>
	<b>4200€</b>	<b>4200€</b>
<b>Other costs</b>		
<b>Application fee:</b>	<b>120 €</b>	<b>120€</b>
<b>Entrance exam fee:</b>	<b>120€</b>	<b>120€</b>

### Way of application:

Send in the application form, CV, two recent passport photographs, a copy of your passport, a copy of certificate, a copy of the official translation of the certificate (if still at school, records of the last two years), copy of the money order of application fee and entrance exam fee.

**Application deadline:** 15<sup>th</sup> May 2012

After submitting the application form and the necessary documents the applicants will be informed about the exact time and place of the interview. The interview is about the applicant's motivation and personal background.

## HUMANITIES

**Name of the programme:** English and American Studies

**Level of the programme:** BA

**Length of the programme:** 8 semesters (2 of semesters of preparatory studies 6 semesters of BA studies)

**ECTS Credits:** 180

**Language of the programme:** English

**Place of the programme:** Trefort Campus

**Start date of the programme:** 5 Sept 2012 – June/July 2016

**Organizational unit of Eötvös Loránd University:** Faculty of Humanities, School of English and American Studies (SEAS)

### **Short description of the programme:**

Preparatory studies (one year): this foundation programme has been designed for students who wish to undertake further studies at ELTE or any other European university, but do not yet have the necessary level of language competence, study skills, and cultural background knowledge to start a BA degree programme.

BA programme (3 years): The School of English and American Studies offers a BA programme in English and American studies. The programme may be completed as a major programme or as a minor programme, the latter of which being available only for students who are in another major programme at ELTE. Students taking the programme as a major opt for either the English or the American track at the end of the first term. The three-year long programme does not provide teaching qualifications, which can be acquired only at the MA level, i.e., with two further years of study.

### **Strengths of the programme:**

Students in the English studies track within the BA programme at the School of English and American Studies are offered a chance to acquaint themselves with the foundations of information technology and typography in the first phase of their studies. This is followed by a series of seminars and lectures aimed at developing students' competence in using English as a language of global communication, academic writing, and everyday oral argumentation in a scholarly and business environment. Students will thus attain the foundations of academic research, evaluation and critical thinking in English literature, British and American socio-political history, and develop an understanding of the linguistic levels of description and analysis of English (phonology and syntax).

Students opting for the American Studies track within the BA programme in English are given the opportunity to acquaint themselves with the background and idiosyncratic features of American history, culture, literature, and the American variety of English. By focusing on these areas of research, the aim of the American Studies track is to impart the students with

the foundations of critical thinking and academic research in order to prepare them for future studies or for successful endeavours when entering the job market.

### **Career opportunities:**

BA graduates are eligible to work towards their studies for an MA degree in English; MA in English with teaching qualifications or MA in American studies.

### **Requirements:**

For entering the preparatory year:

- recommended level of English: at least A2 level of the CEFR (Common European Framework of Reference), i.e. a minimum of approximately 250 hours of previous studies
- *No language certificate is required and meeting the above requirement is at the applicant's discretion*

For entering the BA programme (or following the successful completion of the preparatory year the student is minimally able to achieve):

- TOEFL PBT (Paper-based test): 500
- TOEFL IBT (Internet-based test): 60
- IELTS (International English Language Testing System): 3.5/4.0/4.5
- CEFR (Common European Framework of Reference): B1

<b>Tuition fee/semester</b>	<b>EU/EEA Students</b>	<b>non EEA Students</b>
	<b>750€</b>	<b>750€</b>

**Length of the programme:**      6 semesters

**Language of the programme:**      French

**Place of the programme:**      Trefort Campus

**Start date of the programme:**      5 September 2012

**Organizational unit of Eötvös Loránd University:** Faculty of Humanities, Institute of Romance studies, Department of French language and literature

**Short description of the programme:**      The aim of the study programme is to train professionals of the French language and culture who possess theoretical knowledge and practical skills within the domain of social sciences in order for them to carry out multi-

faceted, inter- and multidisciplinary vocational tasks. Graduates have ample theoretical knowledge to continue their studies in the second cycle.

**Strengths of the programme:** BA degree holders will:

- have comprehensive knowledge of the French culture
- be able to communicate in French both in writing and in speech at an advanced level
- be prepared to study the French language and culture with state of the art methods and techniques of research
- comprehend texts in general and be able to summarise, translate, and interpret them
- be able to make use of their knowledge of the social, economic, and environmental problems of Hungary and France in their careers

**Career opportunities:** Graduates will be able to:

- organise events related to the French culture in the context of governmental, political, economic, and cultural affairs
- hold positions of organisational and administrative nature in the mass media
- mediate using their knowledge of the language and culture in the field of tourism

**Requirements:**

**Name of the programme:** German as a minority language and literature major of Germanic studies

**Level of the programme:** BA

**Length of the programme:** 6 semesters

**Language of the programme:** German

**Place of the programme:** Trefort Campus

**Start date of the programme:** 5 September 2012

**Organizational unit of Eötvös Loránd University:** Faculty of Humanities, Institute of Germanic studies

**Short description of the programme:**

During the training students obtain practical language skills and a comprehensive knowledge of the most important components of and changes in the German culture and the structure, history, and rules of the German language. Furthermore, students will acquaint themselves with the research questions and findings in the field of German linguistics as well as the processes, eras, authors, and literary pieces of the history of German literature. Lastly, students will familiarise themselves with the methodology and branches of literary science in the German-speaking countries and will learn fundamental inter- and multidisciplinary competence. In addition, students will familiarise themselves with the language, language use, literature, culture, and history of the Germans of Hungary. To complement the theoretical knowledge acquired students will gain experience in practical research by joining research projects, carrying out field practice, and possibly gaining work experience at German institutions and organisations.

**Strengths of the programme:**

In addition to the fundamental studies of humanities, philology, and German in the major, students attain 50 credits worth of minority studies in the form of a specialisation track.

It has always been characteristic of the programme to connect research with teaching activity by involving students in the process of data collection and research. One of the focuses of the Centre of Research and Teacher Training for Germans in Hungary (operating within the Institute of Germanic studies) is research on topics relating to the past and present of the Germans of Hungary (history, language, literature, and culture). Two large-scale projects (i.e., the Atlas of German in Hungary and the Dictionary of Regional German in Hungary) endorsed by the department attest to the high standards of research carried out. The Centre works in close co-operation with German organisations in Hungary, institutions of all levels of education, the German media in Hungary, local governments, and museums. The Centre has its own collection of archives (audio, library, corpora) which the students have access to. Associates of the Centre are senior publishers in the topic of Germans of Hungary and they are responsible for multiple series of texts.

### Career opportunities:

Graduates will be able to make use of the knowledge and skills obtained in various fields of cultural life (publishing, written and visual media, cultural institutions, certain areas of public administration and economy).

With regard to the European integration and the cultural traditions and current situation of Hungary there is demand for versatile learned professionals who fluently speak foreign languages. Such professionals possess outstanding rhetorical skills and are able to find their place in the press (both traditional and electronic), tourist industry, international communication, and the fields of economic and scientific life. Moreover, graduates may take up positions at German teaching and cultural institutions in Hungary where such track-specific qualification is a prerequisite. Lastly, they are able to successfully continue their studies at the MA level.

### Requirements:

- Secondary school diploma with advanced exams in German

Tuition fee/semester	EU/EEA Students	non EEA Students
	<b>750 €</b>	<b>750€</b>

**Organizational unit of Eötvös Loránd University:** Faculty of Humanities, Institute of Romance studies, Department of French language and literature

**Short description of the programme:**

The aim of the study programme is to train professionals of the Italian language and culture who possess theoretical knowledge and practical skills within the domain of social sciences in order for them to carry out multi-faceted, inter- and multidisciplinary vocational tasks. Graduates have ample theoretical knowledge to continue their studies in the second cycle.

**Strengths of the programme:**

BA degree holders will:

- be able to communicate in Italian both in writing and in speech at an advanced level
- be prepared to study the Italian language and culture with state of the art methods and techniques of research

- comprehend texts in general and be able to summarise, translate, and interpret them

### **Career opportunities:**

Graduates will be able to:

- organise events related to the French culture in the context of governmental, political, economic, and cultural affairs
- hold positions of organisational and administrative nature in the mass media
- mediate using their knowledge of the language and culture in the field of tourism

### **Requirements:**

- Secondary school diploma
- B2 language skills

<b>Tuition fee/semester</b>	<b>EU/EEA Students</b>	<b>non EEA Students</b>
	<b>750€</b>	<b>750€</b>

### **Way of application:**

To apply to the programme please contact the student advisor or the programme co-ordinator, listed below. You can find further information about the application and application forms at the following websites.

<http://www.btk.elte.hu/en/BA/foreign>, <http://www.btk.elte.hu/en/Alias-129>

**Application deadline:** 20 August 2012

**Name of the programme:** Portugese major of Romance studies

**Level of the programme:** BA

**Length of the programme:** 6 semesters

**Language of the programme:** Portugese

**Place of the programme:** Trefort (Múzeum) Campus

**Start date of the programme:** 5 September 2012

**Organizational unit of Eötvös Loránd University:** Faculty of Humanities, Institute of Romance studies, Department of Portuguese language and literature

**Short description of the programme:**

The aim of the training is to train specialists in Portuguese, Brazilian, and African Portuguese cultures and literatures. At the beginning of the Portuguese studies we offer very intensive language lessons for students who don't speak the Portuguese language. After the history of Portugal and the Portuguese word, Brazil and PALOP (Portuguese Language Speaking African) countries, we introduce students to the literature of Portugal and the Portuguese speaking countries and offer courses on the different cultural aspects of these countries. In our specialised courses students can get to know the cinema, theatre, music, and fine arts of Portugal and Brazil.

**Strengths of the programme:**

The BA-training admits students without knowledge of the Portuguese language as we can offer outstanding language classes. Our speciality is the close co-operation with the Portuguese Camões Institute and the Galego Language Centre in Budapest. Thus we offer possibilities of Portuguese Language Exams, as well as learning the Galego and Catalan language and culture.

**Career opportunities:**

After 3 years of training students of Portuguese have a reliable knowledge of the Portuguese language (level B2, C1) and the Portuguese language cultures, and so they can get a job in transnational companies, in the tourist industry, in foreign trading, in different mass media forums, or as translators and interpreters.

**Requirements:**

School-leaving examination (at a secondary school) of two of the following subjects/majors: English, French, Italian, Spanish, German, Latin, Romanian, Russian, Hungarian Literature, History

<b>Tuition fee/semester</b>	<b>EU/EEA Students</b>	<b>non EEA Students</b>
	<b>750€</b>	<b>750€</b>

**Name of the programme:** Romanian major of Romance studies

**Level of the programme:** BA

**Length of the programme:** 6 semesters

**Language of the programme:** Romanian

**Place of the programme:** Trefort Campus

**Start date of the programme:** 5 September 2012

**Organizational unit of Eötvös Loránd University:** Faculty of Humanities, Institute of Romance studies, Department of Romanian philology

**Short description of the programme:**

The aim of the study programme is to train professionals of the Romanian language and culture who possess theoretical knowledge in order for them to be able to continue their studies immediately after graduation or after a couple of years or work experience in the form of the MA training. At the same time, practical skills are also emphasised, thereby giving graduate the opportunity to successfully compete in the labour market as translators or interpreters.

**Strengths of the programme:**

The Department of Romanian philology of today was established in 1863, and was the first department of Romanian language and literature in Europe outside Romania. The department has multiple contracts of agreement with several Romanian universities and institutes of academic research. The department is in close co-operation with the universities of Bucharest and Oradea in the framework of the ERASMUS programme. The degree issued by the department complies with EU regulations and is officially acknowledged in Romania owing to the bilateral agreement between the two countries.

**Career opportunities:**

Opportunities for graduates include positions related to Romanian language and culture, and with the EU membership of Hungary and Romania a plethora of difficulties arose concerning language and communication, publishing, mass media, ministerial connections, foreign affairs and cultural relations, diplomacy, and tourism in particular.

**Requirements:**

- Secondary school diploma
- Basic Romanian language competence

<b>Tuition fee/semester</b>	<b>EU/EEA Students</b>	<b>non EEA Students</b>
	<b>750€</b>	<b>750€</b>

**INFORMATION TECHNOLOGY**

**Name of the programme:** Computer Science, Software Information Technology

**Level of the programme:** BSc

**Length of the programme:** 6 semesters

**Type of the programme:** Full time

**ECTS Credits:** 180

**Language of the programme:** English

**Place of the programme:** Lágymányos Campus

**Start date of the programme:** 5 Sept 2012 – 30 June 2015

**Organizational unit of Eötvös Loránd University:** ELTE Faculty of Informatics

**Short description of the programme:**

The objective is to train Computer Programme Designers with a professional knowledge based on a solid theoretical background knowledge. They have the skills to take part in programme development, in developing information systems and system management in various areas. The Computer Programme Designer often acts as a mediator between the customers of information systems and the producers. In this way, the job of a Programme Designer synthesises the constructive activity of engineers with the general problem-solving attitude of mathematicians while participating in teams of large-scale projects.

The programme provides students with a broad education in Computer Science in combination with specialised work in computer and information processing techniques, programming languages, data structures, information retrieval, operating systems, compiler design, etc. Students learn the theory as well as the methodologies and techniques in the development and implementation of computer systems.

**Strengths of the programme:**

The high standard of training is guaranteed by the highly qualified academic staff. Teaching is supported by modern infrastructure and well equipped computer labs (artificial intelligence, databases, and robotics). The library of the Faculty contains several thousand volumes. The students of higher years and PhD students help the first year students in a mentor system to overcome their first challenges at the university.

In addition to the high level of theoretical training, the Faculty's relationship with the business community, the joint research and development projects offer up-to-date practical knowledge and experience to the students. The Faculty has concluded bilateral agreements with numerous universities in the world, which allows students to study one or two semesters or participate in research projects at a partner institution.

Extracurricular undergraduate research activities of the students are supported and supervised by leading scientists of the Faculty. These students present their findings at a conference organised by the Faculty every year.

Workshops are also organised with international partners.

### **Career opportunities:**

Computer Programme Designers are welcome in every sector of informatics. Jobs are offered by large international computer companies, outstanding Hungarian firms, banks, large enterprises, state institutions, software development companies, research institutes and universities where they may be engaged in the preparation of integrated data processing systems, electronic trade transactions and electronic money transfers, solving telecommunication problems (networks, programming mobile phones), performing image recognition, computer-aided design, image processing or preparing multimedia applications.

### **Requirements:**

Secondary school certificate or a higher education diploma

<b>Tuition fee/semester</b>	<b>EU/EEA Students</b>	<b>non EEA Students</b>
	<b>3000€</b>	<b>3000€</b>

### **Other costs**

Registration fee	140€	140€
------------------	------	------

\* in the first semester

### **Way of application:**

Application deadline: 30 April 2012 Applicants should send their application material by post to the Faculty or via email attachment to the Programme Co-ordinator

Applicants will get notification via e-mail or post by the end of June 2012.

Applications are evaluated and ranked by the appropriate committee of the Faculty of Informatics.

## SCIENCE

**Name of the programme:** Biology

**Level of the programme:** BSc

**Length of the programme:** 6 semesters

**Type of the programme:** Full time

**ECTS Credits:** 180

**Language of the programme:** English

**Place of the programme:** Lágymányos Campus

**Start date of the programme:** (5 Sept 2012 -

**Organizational unit of Eötvös Loránd University:**

### **Short description of the programme:**

The curriculum includes **introduction** to the major disciplines of science that support various biological subjects (chemistry, physics, mathematics, informatics - Module 2), **basic** courses in biology (Module 3), **advanced** courses in biology (Module 4) and **special** courses (Module 5 - for further details of the curriculum and the content of Modules see the "[Curriculum of the B.Sc. program](#)"). In the case of the special courses (starting from the 3<sup>rd</sup> semester), students have a certain freedom of choice in assembling their own list of courses they wish to attend, according to their interest and their later choice of M.Sc. programme specialisation. To obtain their degree, candidates of B.Sc. have to write and orally present a "B.Sc. Thesis". It must be **an up-to-date critical review** of the relevant scientific literature about a biological problem. A committee from teachers in the biology programme will evaluate the „B.Sc. Thesis”.

### **Strengths of the programme:**

Students participate in **intensive basic and advanced level courses** to gain an essential theoretical knowledge **in the different fields of biology**, and to become familiar with the most important methods. The theoretical and practical knowledge of B.Sc. graduates enables them to recognise and analyse new scientific problems in biology, and to plan, perform, and evaluate simple laboratory or open field experiments for their investigation. The knowledge obtained in the B.Sc. programme also forms an excellent basis for the continuation of studies in an M.Sc. programme.

### **Requirements:**

The successful applicant must be at least 17 years of age, a graduate of a high school or a senior secondary school (with graduation equivalent to the General Certificate of Education

[UK] or high school diploma [US]), or must have at least three completed years of a four-year secondary school where the last year is a pre-university programme. The prerequisite of acceptance is a good command of English.

<b>Tuition fee/semester</b>	<b>EU/EEA Students</b>	<b>non EEA Students</b>
	<b>2900</b>	<b>2900</b>

#### **Other costs**

Application fee	160	160
Registration fee	60	60

\*No registration fee is charged in the first semester

#### **Way of application:**

To apply to the programme please contact the student advisor or the programme co-ordinator, listed below. You can find further information about the application and application forms at the following websites.

**Further information:** [http://www.bio.elte.hu/engedu/BSC\\_program.htm](http://www.bio.elte.hu/engedu/BSC_program.htm)

#### **Scholarships/Discounts:**

At present Eötvös Loránd University cannot offer scholarships, however, we give a \*20% fee reduction to our best B.Sc. and M.Sc. biology students\*, from the second year on, determined by their performance in the previous year.

## EDUCATION AND PSYCHOLOGY

**Name of the programme:** Psychology

**Level of the programme:** MA

**Length of the programme:** 4 semesters

**Type of the programme:** Full time

**ECTS Credits:** 120

**Language of the programme:** English

**Place of the programme:** IZU Campus

**Start date of the programme:** 5 Sept 2012 – 4 July 2014

**Organizational unit of Eötvös Loránd University:** Faculty of Education and Psychology,  
Institute of Psychology

### **Short description of the programme:**

The aim of the qualification is to train psychologist professionals who master the theories and methods of the science of psychology at an advanced level, are proficient in the various fields of psychology, possess the skills and techniques of the psychologist profession, and are able to apply these to help individuals, groups or organisations develop and improve. Further aims are to present recent theoretical and practical material, to establish professional skills and commitment for the profession within the field of psychology at a level that gives a solid foundation of knowledge that enables the student to practice psychology as a vocation independently at a master level, to participate in postgraduate courses and to attend further training in doctoral schools. A master of psychology is characterised by expansive and integrated professional and theoretical knowledge, the creative adaptation of the methods of academic knowledge, psychological responsiveness and communicational efficacy through the utilisation of personal resources along with a high degree of professional commitment.

### **Strengths of the programme:**

The foreign language qualification of ELTE has a long history stemming from the internationally known workshops and the teachers who are also recognised internationally. The English Language University Programmes in Psychology (hereafter: ELUP) exists since 1991, as an English language version of the Hungarian curriculum. During these 19 years the Institute welcomed 50-60 students per year from a wide range of foreign countries.

As one can see, the foreign student/teacher ratio supports a tutorial-like atmosphere which can boost communication and guidance effectiveness among the students and their teachers.

Regarding headcount, the professional preparedness, administrative capacity and infrastructural conditions of the institute, the Faculty of Education and Psychology at ELTE is the best Institute of Psychology in Hungary.

### **Career opportunities:**

The Psychology Master degree gives qualification as a psychologist in health activities, in educational and organisational settings, in developmental issues and in research. With the specialisation in Clinical and Health Psychology, psychologists will be able to use their knowledge professionally and efficiently in the scientifically claimed examination of the healthy or pathologically altered processes of the psyche, in supporting the diagnostics and treatment of patients with psychic or somatic diseases in the research and practice of disease prevention and health promotion.

The programme also prepares students for the practical co-operation with other professionals in health care and gives a fine basis to a successful participation in interdisciplinary research, doctorate courses or postgraduate courses.

The programme is compatible with the Bologna system and EuroPsy requirements, as well as the regulations of some other non-EU countries, which means the degree is internationally recognised and gives an opportunity to work in the field all over the world.

### **Requirements:**

Psychology or Psychology-related (e.g. Behaviour Science) Degree (BA or higher)

<b>Tuition fee/semester</b>	<b>EU/EEA Students</b>	<b>non EEA Students</b>
	4200€	4200€

### **Other costs**

Application fee	120	120
-----------------	-----	-----

### **Way of application:**

**Application deadline:** 15 April 2012

Apply by sending the application form, CV, two recent passport photographs, a copy of your passport, a copy of your certificate, a copy of the official translation of the certificate (if still at school, records of the last two years), and a copy of the money order of the application fee and entrance exam fee.

The entrance examination consists of 2 essays about psychology. The essays are based on Atkinson & Hilgard's Introduction to Psychology by Smith, E. E., Nolen-Hoeksema, S., Fredrickson, B. L., Loftus, G. R., published by Wadsworth/Thomson Learning, Belmont, 2003 (14th edition).

No later than three weeks after the entrance exam the applicant will be informed about the decision by email and by post.

**HUMANITIES**

**Name of the programme:** American Studies

**Level of the programme:** MA

**Length of the programme:** 4 semesters

**Type of the programme:** Full time

**ECTS Credits:** 120

**Language of the programme:** English

**Place of the programme:** Trefort Campus

**Start date of the programme:** 5 Sept 2012 – June/July 2014

**Organizational unit of Eötvös Loránd University:** Faculty of Humanities, School of English and American Studies (SEAS)

**Short description of the programme:**

The robust presence of the United States throughout the world, well observable in the contexts of politics, economy, and culture, calls for a body of experts who – aside from having excellent English language skills – have a specialised knowledge in the history, politics, society, culture, language, and literature of the United States. With this aim in mind, the MA programme in American Studies seeks to impart its graduates with the necessary theoretical knowledge and practical skills that can be fruitfully utilised in both private and public sector establishments interested in the communication and/or representation of American values and interests.

**Strengths of the programme:**

Students will acquire:

- a sound knowledge of and fluency in American English (oral and written, academic style)
- in-depth knowledge of the culture, history, and literature of the United States

- in-depth knowledge of the determining communicational channels of the United States (TV, press, internet, etc.).

### **Career opportunities:**

- in all fields requiring a university degree without specifications of majors
- in PhD programmes requiring a major specific degree

### **Requirements:**

- you must have a BA in English or a similar degree or
- you must meet at least the following language proficiency requirements (officially proved):
  - TOEFL PBT (Paper-based test): 550 or
  - TOEFL iBT (Internet-based test): 90 or
  - IELTS (International English Language Testing System): 5.0/5.5/6.0 or
  - CEFR (Common European Framework of Reference): B2

You must also submit a transcript of records (full).

<b>Tuition fee/semester</b>	<b>EU/EEA Students</b>	<b>non EEA Students</b>
	<b>850€</b>	<b>850€</b>

**Type of the programme:** Full time

**ECTS Credits:** 120

**Language of the programme:** English

**Place of the programme:** Trefort Campus

**Start date of the programme:** 5 Sept 2012 – June/July 2014

**Organizational unit of Eötvös Loránd University:** Faculty of Humanities, School of English and American Studies (SEAS)

**Short description of the programme:**

Students opting for MA in English will become proficient at producing academic and media-oriented publications in the fields of English literature and English language-based cultures, mediating in English and Hungarian in specialised cultural, economic and political areas, teaching and transmitting knowledge concerning English literature and English language-based cultures and societies.

**Strengths of the programme:**

The aim of the specialisation track in English applied linguistics is to help students acquire linguistic knowledge for understanding how language is acquired and used in practice. The practical skills acquired in the programme are applicable in a variety of professions, while the familiarity with conducting research provides the foundation for further studies at PhD level.

Students who decide to choose the English theoretical linguistic track will become acquainted with the high level of analysis required in the fields of phonology, morphology, syntax, etymology and history of English (and other) language(s). Students will thus gain an insight into the minutiae of analysis of modern (and classical) schools of linguistics. There are also other specialisation tracks available with a wealth of opportunities for discovery and pursuance of one's interests.

**Career opportunities:**

- in all fields requiring a university degree without specifications of majors
- in PhD programmes requiring a major specific degree

**Requirements:**

- you must have a BA in English or a similar degree or
- you must meet at least the following language proficiency requirements (officially proved):
- TOEFL PBT (Paper-based test): 550 or

- TOEFL iBT (Internet-based test): 90 or
- IELTS (International English Language Testing System): 5.0/5.5/6.0 or
- CEFR (Common European Framework of Reference): B2

You must also submit a transcript of records (full).

<b>Tuition fee/semester</b>	EU/EEA Students	non EEA Students
<b>Other costs</b>	<b>850€</b>	<b>850€</b>

Fax no.: +36 1-485-5229

**Name of the programme:** History (Specialisation: History of civilisation, globalisation and European territories, 19<sup>th</sup> and 20<sup>th</sup> centuries)

**Level of the programme:** MA

**Length of the programme:** 4 semesters

**Type of the programme:** Full time

**ECTS Credits:** 120

**Language of the programme:** English

**Place of the programme:** Trefort Campus

**Start date of the programme:** 5 Sept 2012 – June/July 2014

**Organizational unit of Eötvös Loránd University:** Faculty of Humanities, School of English and American Studies (SEAS)

**Short description of the programme:**

The course offers a broad historical view on the history of Europe and that of the related territories and a special set of seminars and tutorials on the problems of

- international relationships in a wide sense;
- the political, economic, social, and cultural questions related to globalisation;
- civilisational interactions, multiculturalism;
- schools and systems of international relationships;
- theories connected to globalisation and to international relationships;
- history of traditional diplomacy; questions of war and peace, revolutions, uprisings, terrorism, security policy; place and role of European and outer-European World in international relationships;
- colonisation, decolonisation; structure and changes of The Great Power's club, the history of participants in the 19<sup>th</sup>-20<sup>th</sup> century; questions of small states and regionalism; interactions, disintegrations in Europe;
- minority movements, questions of migrations;
- political régimes: the path from feudalism to civil society; constitutional parliamentarism, authoritarian systems, dictatorships, democracies.

**Strengths of the programme:**

The History Institute of ELTE has a rare advantage of being able to cover European and World History from the antiquities to the most recent times. Students can profit from this special hub of knowledge to find the proper period and/or the area in history most relevant to their interests as well as studying a broad description of history following special problématiques such as mentalities, politics, civil society, etc. There is also an excellent opportunity to learn how to read between the lines by using historical hermeneutics and the tacit knowledge of Central European historians brewed under different dictatorial régimes.

**Career opportunities:**

Historical knowledge and the capacity to analyse texts, contexts and situations from a broader point of view make our students popular in all decision-making circumstances. Students majoring in History at ELTE can be great researchers, teachers and decision makers in the fields of culture, economics, and politics.

<b>Tuition fee/semester</b>	<b>EU/EEA Students</b>	<b>non EEA Students</b>

**Name of the programme:** European Territories (Civilisation, nation, region, city): Identity and Development, TEMA Erasmus Mundus Master Course

**Level of the programme:** MA

**Length of the programme:** 4 semesters

**Type of the programme:** Full time

**ECTS Credits:** 120

**Language of the programme:** French and English

**Place of the Programme:** Trefort Campus and one of the universities of the consortium

**Start date of the programme:** 5 September 2012 -

**Organizational unit of Eötvös Loránd University:** Faculty of Humanities, Atelier

**Short description of the programme:**

The 2-year-long (120 ECTS) European Master Course TEMA – European Territories (Civilisation, Nation, Region, City): Identity and Development proposes the analysis of political use and scientific representation of territorial units (civilization, nation, region, city) in an interdisciplinary, research-based curriculum.

Organised in four major modules: civilization, nation, region and city, that represent four research scales, as well as four different approaches to historical, political, social, and cultural issues of space and those of territory, the TEMA Master provides students with an in-

depth understanding of European cohesion policy and regional development emphasising on legal framework and scientific analysis.

### **Strengths of the programme:**

An individual tutorial supervision is offered to each student. The students receive a systematic introduction to scientific research within the framework of the methodological seminars in view of defending their master thesis in the 4th semester.

TEMA Master Course is offered by a consortium of the following European universities: Eötvös Loránd University of Budapest, Hungary, École des Hautes Études en Sciences Sociales of Paris, France, University of Catania, Italy, and Charles University of Prague, Czech Republic.

### **Career opportunities:**

TEMA graduates receive double or multiple degrees (according to their mobility track), as well as a diploma supplement at the end of their studies, allowing them to enter into the professions in the area of local, regional, national and European territorial administration, in urban planning and research institutions.

### **Requirements:**

To apply for Master TEMA students must hold a first degree (BA/BSc /180 ECTS/) in History, Geography, Anthropology, Ethnography, Cultural studies, Urban Studies, Nationalism Studies, Law, Economy, Administration. The selection is based on academic excellence and proficiency in English and in French, which are the languages of instruction.

<b>Tuition fee/semester</b>	<b>EU/EEA Students</b>	<b>non EEA Students</b>
	<b>1000€</b>	<b>3000€</b>

No other fees will be charged for application to TEMA Master Course.

### **Way of application:**

An on-line application form must be registered at [www.mastertema.eu](http://www.mastertema.eu) and a complete application package must be sent by post to the TEMA Secretariat **before 20 May 2012** (date of postmark).

### **Erasmus Mundus Scholarship:**

The Erasmus Mundus programme offers two categories of scholarships to students selected by the consortium. The number of available scholarships is defined on a yearly basis.

#### **Category A scholarships**

Candidates who fulfil the Third country students criteria\* are eligible for a category A Erasmus Mundus scholarship, awarded on the basis of academic excellence.

The scholarship consists of a 1000 € monthly allowance, a contribution to travel, installation and any other type of cost up to 4000 € per year and a maximum contribution to the Master Course participation costs (including insurance coverage) up to 4000 € per semester.

The monthly allowance amount may be increased in order to help cover the additional costs of students with special needs.

#### Category B scholarships

Candidates who fulfil the European students criteria\* are eligible for a category B Erasmus Mundus scholarship, awarded on the basis of academic excellence.

The scholarship consists of a 500€ monthly allowance and a maximum contribution to the Master Course participation costs up to 2000€ per semester.

The monthly allowance amount may be increased in order to help cover the additional costs of students with special needs.

\* Third country students : students from countries other than a Member State of the European Union, an EEA-EFTA State (Iceland, Norway, and Lichtenstein), who are not residents nor have carried out their main activity (studies, training or work) for more than a total of 12 months as from the 28th of February 2006 in one of these countries.

\* European students: students selected by the consortium who do not fulfill the above mentioned criteria.

Please note that only category A scholarships should be considered as full scholarships. Category B scholarships have to be considered as a financial contribution to the student's costs.

Students who apply for scholarship categories A and B

An on-line application form must be registered at [www.mastertema.eu](http://www.mastertema.eu) and a complete application package must be sent by post to the TEMA Secretariat **before 10 January 2012** (date of postmark).

**Name of the programme:** French language, literature, and culture

**Level of the programme:** MA

**Length of the programme:** 4 semesters

**Type of the programme:** Full time

<b>ECTS Credits:</b>	120
<b>Language of the programme:</b>	French
<b>Place of the Programme:</b>	Trefort Campus
<b>Start date of the programme:</b>	5 September 2012

**Organizational unit of Eötvös Loránd University:** Faculty of Humanities, Institute of Romance studies, Department of French language and literature

**Short description of the programme:** The history of teaching French at our department dates back 235 years and the department is the largest and oldest of its kind in Hungary. High quality teaching is ensured by 20 qualified tutors and 3 native speaking lecturers.

MA students participate in a training encompassing the French language, literature, and culture. Detailed curriculum can be found at our homepage.

The MA is concluded by the preparation and successful defence of a thesis.

### **Strengths of the programme:**

During the training students will

- gain knowledge of contemporary questions in French literature research (history of literature from medieval times up until present, hispanic literature, etc.)
- obtain practice in scientific literature analysis
- acquaint themselves with the methodology of literature research and gains experience in research
- delve into the various techniques of French text composition
- improve oral skills in the foreign language
- get a deeper understanding of linguistics, study current fields of linguistic research (e.g., simultaneous linguistics, language history, descriptive linguistics, textual linguistics, lexicology, phraseology, sociolinguistics, etc.)
- practice translation

### **Career opportunities:**

MA level studies in humanities within the modern philology field, especially in the case of the French studies which consider the needs of the labour market, tend to strive to produce professionals who meet the increasingly growing requirements of intellectual occupations mostly related to services (field of arts, social sciences track, journalism, text composition, translation, drafting of tenders, etc.), while at the same time prepare them for broader topics for assistant positions related to humanities. Furthermore, it is important to note the increasing demand for humanities graduates, irrespective of their study tracks, who are equipped with general knowledge, empathy, and high level of communication skills, for positions of deputy manager, expert of human policy, etc.

The training emphasises preparation for scientific research and provides an excellent opportunity to continue studies at the PhD level.

**Requirements:**

- BA degree in Romance studies with a French track or
- Equivalent college diploma or
- At least 50 credits of previous studies pertaining to the French track of Romance studies with a certificate of advanced language skills in French

<b>Tuition fee/semester</b>	<b>EU/EEA Students</b>	<b>non EEA Students</b>

**Name of the programme:** German language, literature, and culture

**Level of the programme:** MA

**Length of the programme:** 4 semesters

**ECTS Credits:** 120

**Language of the programme:** German

**Place of the Programme:** Trefort Campus

**Start date of the programme:** 5 September 2012

**Organizational unit of Eötvös Loránd University:** Faculty of Humanities, Institute of Germanic studies, Department of German language and literature

**Short description of the programme:**

The MA training contains subjects in the field of linguistics that provide adequate (both theoretical and methodological) fundamental knowledge in the areas of linguistics such as linguistic systems and applied linguistics (sociolinguistics, pragmatics, the connection between language and the media, etc.). Furthermore, aside from the distinguished vocational training students may delve into special fields of interest in the form of specialisations and acquaint themselves with recent areas of research and scientific debates in general as well as German linguistics.

The MA programme attempts to prepare future research carried out in the fields of literature and cultural science from aspects of literature history, theory, cultural and media science together with providing comprehensive knowledge and development of skills for students not continuing their studies at the PhD level. In this way students may be offered subjects specialising in specific problems related to the literature and culture of German-speaking countries, thereby offering a chance to study interdisciplinary literature by focusing on characteristics of certain eras, authors and literary pieces with respect to genre theory, sociology of literature, aesthetics, history of arts, and theory of literature. Seminars provide an opportunity to study very specific topics directly linked to areas of research.

### **Strengths of the programme:**

Further branching of studies is possible in order to study certain areas more closely and prepare the student for a possible scientific career in the future. Making use of the advantages of the institute students have the possibility for an MA training in comparative German studies.

Teaching is supplemented by the international agreements of the institute and the extensive scientific contributions of its professors. This provides an opportunity for students to delve into recent areas of research in language, literature, and culture sciences.

### **Career opportunities:**

Graduates will be able to make use of the knowledge and skills obtained in various fields of cultural life (publishing, written and visual media, cultural institutions, certain areas of public administration and economy), with the most outstanding students getting the opportunity to carry out scientific research in their PhD studies.

### **Requirements:**

Ba degree in the relevant field or equivalent vocational training

Official certificate of advanced language proficiency (KER C1 level) in German

Entrance examination:

Cover letter of 3 to 5 pages, pretyped (reasons for choosing MA studies, career goals, future plans)

### **Tuition fee/semester**

EU/EEA Students

non EEA Students

**850€**

**850 €**

**Name of the programme:** German as a minority language and literature

**Level of the programme:** MA

**Length of the programme:** 4 semesters

**Type of the programme:** Full time

**ECTS Credits:** 120

**Language of the programme:** German

**Place of the programme:** Trefort Campus

**Start date of the programme:** 5 September 2012

**Organizational unit of Eötvös Loránd University:** Faculty of Humanities, Institute of Germanic studies, Department of German language and literature

**Short description of the programme:**

The MA training contains subjects in the field of linguistics that provide adequate (both theoretical and methodological) fundamental knowledge in the areas of linguistics such as linguistic systems and applied linguistics (sociolinguistics, pragmatics, the connection between language and the media, etc.). The backbone of the MA training comprises of lectures and seminars on the history and theory of literature, culture and media sciences. In this way students may be offered subjects specialising in specific problems related to the literature and culture of German-speaking countries, thereby offering a chance to study interdisciplinary literature by focusing on characteristics of certain eras, authors and literary pieces with respect to genre theory, sociology of literature, aesthetics, history of arts, and

theory of literature. Seminars provide an opportunity to study very specific topics directly linked to areas of research.

The German as a minority language and literature MA produces proficient graduates in German who have a thorough understanding of the culture, language use, and literature of the Germans of Hungary.

In the form of a focus track worth 40 credits students acquire comprehensive knowledge of the structural system, branches of literature science, schools, topics in literature history, and the areas of culture, the interaction between language, culture, and literature and its mediations with a synchronic and diachronic approach of the German language. Furthermore, the major gives a good understanding of topics of minority studies, more specifically the language, language use, history, literary activity, culture, and sense of identity of the Germans of Hungary. In parallel with the training in systematic language and literature science of an interdisciplinary nature, during their training in theory and practice students attain general and specific knowledge of the methodology developed for schools of minorities which enable them to utilise their knowledge and skills in the German language and the field of ethnic and minority sciences.

### **Strengths of the programme:**

Further branching of studies is possible in order to study certain areas more closely and prepare the student for a possible scientific career in the future.

It has always been characteristic of the programme to connect research with teaching activity by involving students in the process of data collection and research. One of the focuses of the Centre of Research and Teacher Training for Germans in Hungary (operating within the Institute of Germanic studies) is research on topics relating to the past and present of the Germans of Hungary (history, language, literature, and culture). Two largescale projects (i.e., the Atlas of German in Hungary and the Dictionary of Regional German in Hungary) endorsed by the department attest to the high standards of research carried out. The Centre works in close co-operation with German organisations in Hungary, institutions of all levels of education, the German media in Hungary, local governments, and museums. The Centre has its own collection of archives (audio, library, corpora) which the students have access to. Associates of the Centre are senior publishers in the topic of Germans of Hungary and they are responsible for multiple series of texts.

### **Career opportunities:**

Graduates will be able to make use of the knowledge and skills obtained in various fields of cultural life (publishing, written and visual media, cultural institutions, certain areas of public administration and economy), with the most outstanding students getting the opportunity to carry out scientific research in their PhD studies.

### **Requirements:**

**Name of the programme:** Hungarian Studies

**Level of the programme:** MA

**Length of the programme:** 4 semesters

**Type of the programme:** Full time

**ECTS Credits:** 120

**Language of the programme:** Hungarian

**Place of the programme:** Trefort Campus

**Start date of the programme:** 5. September 2012-

**Organizational unit of Eötvös Loránd University:** Faculty of Humanities, Institute of History

**Short description of the programme:**

The interdisciplinary hungarology MA provides comprehensive knowledge on the Hungarian cultural legacy, identifies its unique traits, and its European as well as regional counterparts and embeddedness. It aims to provide a perspective which enables the Hungarian national culture to be interpreted within different cultural codes as well as to observe different cultures unprejudiced. The courses assume historical, scientific, literary, linguistic, and ethnic aspects in studying Hungarian culture. The extent to which students focus on the various study fields depends on the chosen study track from history, literature, linguistics, and Hungarian as a foreign language. It is a prerequisite for applicants to hold a BA degree in the equivalent field in order to be admitted. The training does not require a track to be chosen.

### **Strengths of the programme:**

The hungarology MA of the Faculty of Humanities of ELTE aims to offer a deeper and more versatile knowledge to outstanding foreign students than other hungarology studies abroad. High standards and the plethora of specialisation options are ensured by the involvement of our most influential institutes in the training. These are the Institute of History, the Institute of Hungarian Language and of Finno-Ugric Studies, and the Institute of Hungarian Literature. For the foreign hungarologist the opportunity to study at the greatest faculty of humanities in Hungary, in the Hungarian language, and together with Hungarian students guarantees quality in both their competence as well as knowledge.

### **Career opportunities:**

Graduates will be suitable for tasks involving the introduction of the Hungarian cultural legacy and research related to it. They will be able to mediate between Hungarian and other cultures they are familiar with and effectively co-operate in cultural and scientific fields via their intercultural competences. These skills are gaining more and more importance with the advancement of the European integration and regional co-operation and the spread of multiculturalism. The qualification provides relevant knowledge and skills both on the foreign and the Hungarian labour market.

Graduating students will be able to settle in the different areas of cultural services primarily (e.g., media, teaching, cultural tourism, diplomacy). Furthermore, graduates also have the chance to lay the foundations of a scientific career the interdisciplinary and intercultural nature of the programme helps to achieve in addition to orientating towards modern branches of research. Students choosing a study track will develop deeper knowledge and skills within their sub-field, which provides a suitable starting point to PhD training.

### **Requirements:**

1. BA degree in hungarology, linguistics, literature, or history. The study track the student can choose within the hungarology MA is determined by the BA degree.
2. Certificate of advanced language skills in Hungarian in order for the applicant to successfully participate in lectures and seminars in Hungarian.

<b>Tuition fee/semester</b>	<b>EU/EEA Students</b>	<b>non EEA Students</b>

**Name of the programme:** Logic and Theory of Science

**Level of the programme:** MA

**Length of the programme:** 4 semesters

**Type of the programme:** Full time

**ECTS Credits:** 120

**Language of the programme:**

**Place of the programme:** Trefort Campus

**Start date of the programme:** 5 Sept 2012 – 10 June 2014

**Organizational unit of Eötvös Loránd University:** Faculty of Humanities, Department of Logic

**Short description of the programme:**

The programme focuses on logic and its applications in the philosophy of science, particularly in the foundations of mathematics, physics, linguistics, and the social sciences. Beyond a few core courses and a joint four-semester seminar series, providing a kind of common background to all students, we offer the following four optional modules: Logic and the Philosophy of Mathematics, Foundations of Physics, Logic in Linguistics and Models in the Social Sciences.

**Strengths of the programme:**

The programme aims at developing research abilities of the students. Its central part is the Logic and its Applications Seminar of the Department of Logic where students and staff members discuss their works in progress.

### **Career opportunities**

The programme is designed for those who want to continue their studies on postgraduate level. Graduates will have good chances to apply to PhD schools in philosophy, mathematics, linguistics, informatics, physics, economics, and sociology.

### **Requirements:**

BA/BSc in philosophy, mathematics, physics, linguistics or economics.

**Name of the programme:**      Polish Language and Literature MA

**Level of the programme:**      MA

**Length of the programme:**      4 semesters

**Type of the programme:**      Full time

**ECTS Credits:**                      120

**Language of the programme:**      Polish

**Place of the programme:** Trefort Campus

**Start date of the programme:** 5 September 2012 -

**Organizational unit of Eötvös Loránd University:** Faculty of Humanities, Institute of Slavonic and Baltic Studies, Department of Polish Studies

**Short description of the programme:**

The goal of the MA studies is to acquire comprehensive knowledge of Polish literature from its early period to our age in a European context, as well as to acquire extensive knowledge of Polish grammar and the history of the language. Moreover, students get acquainted with the latest theories in linguistics, sociolinguistics, textology, lexicology, stylistics, and phraseology. Developing both oral and written proficiency in Polish is an important component of our education programme.

**Strengths of the programme:**

Students who graduate from our university with an MA degree in Polish have general knowledge of philology with specialisation in Polish literature and linguistics. Our department specialises in linguistics in general and in the linguistic image of the world, cognitive linguistics and lexicology in particular.

**Career opportunities:**

Graduates of our university have opportunity to work for Polish and/or Hungarian joint companies in the field of culture, in the tourist industry, or to find work related to co-operation between Poland and Hungary in general.

**Requirements:**

GCE examination, BA degree, command of Polish at intermediate level

**Name of the programme:** Portugese language, literature, and culture

**Level of the programme:** MA

**Length of the programme:** 4 semesters

**Type of the programme:** Full time

**ECTS Credits:** 120

**Language of the programme:** Portugese

**Place of the programme:** Trefort Campus

**Start date of the programme:** 5 September 2012

**Organizational unit of Eötvös Loránd University:** Faculty of Humanities, Institute of Romance studies, Department of French language and literature

**Short description of the programme:**

The Portuguese MA study programme goes deeply into the majors studied during the BA period. Students study literary and linguistic theory, medieval literature, literature of the 19<sup>th</sup> century and the modern age of Portugal and Brazil, focusing on the work of the most distinguished authors. In linguistics, studies of the history of the language are followed by courses of lexicology, morphology and syntax. There are some courses of translation of scientific texts and courses of composing scientific studies and essays.

**Strengths of the programme:**

The aim of this Portuguese MA-programme is to train students of Portuguese linguistics and literature who would like to achieve a scientific career at a high level in the future and prepare participants for PhD. studies. This way the professors and lecturers of the course closely follow the development of the students, who also have the opportunity to study at a Portuguese University (in the Erasmus mobility) for one semester and study with visiting professors who give lectures in the Portuguese Department.

**Career opportunities:**

The MA students of Portuguese finish their training with a high level of knowledge of Portuguese. Thus, they can work as language teachers in public schools or language

schools, can work in editorial offices as editors or translators, in ministries like the Ministry of Foreign Affairs or Foreign Trade and in International companies in leading positions.

**Requirements:**

- BA degree in Portuguese or Portuguese minor (with a B2-C1 language exam if the students choose to become language teachers)

<b>Tuition fee/semester</b>	<b>EU/EEA Students</b>	<b>non EEA Students</b>
	<b>850€</b>	<b>850€</b>

**Way of application:**

To apply to the programme please contact the student advisor or the programme co-ordinator, listed below. You can find further information about the application and application forms at the following websites.

<http://www.btk.elte.hu/en/BA/foreign>, <http://www.btk.elte.hu/en/Alas-129>

**Application deadline: 20 August 2012**

**Name of the programme:** Romanian language, literature, and culture

**Level of the programme:** MA

**Length of the programme:** 4 semesters

**Type of the programme:** Full time

**ECTS Credits:** 120

**Language of the programme:** Romanian

**Place of the programme:** Trefort Campus

**Start date of the programme:** 5 September 2012

**Organizational unit of Eötvös Loránd University:** Faculty of Humanities, Institute of Romance studies, Department of French language and literature

**Short description of the programme:**

MA level studies in humanities within the modern philology field tend to strive to produce professionals who meet the increasingly growing requirements of intellectual occupations mostly related to services (field of arts, social sciences track, journalism, text composition, translation, drafting of tenders, etc.), while at the same time prepare them for broader topics for assistant positions related to humanities. Furthermore, it is important to note the increasing demand for humanities graduates, irrespective of their study tracks, who are equipped with general knowledge, empathy, and high level of communication skills, for positions of deputy manager, expert of human policy, etc.

The training emphasises preparation for scientific research and provides an excellent opportunity to continue studies at the PhD level.

### **Strengths of the programme:**

The significance of the Romanian language was greatly increased on 1 January 2007 when Romania entered the European Union which made Romanian an official language of the EU. Thus it is important to train people with excellent Romanian language proficiency and knowledge of culture and literature not only for every-day communication but also for the economic advantages to be gained. It is important to note that the department of Romanian philology plays a more important role than in the west owing to geographical, historical, and cultural reasons. Thus the training pays special attention to highlighting cultural and literary ties between Hungary and Romania.

### **Career opportunities:**

Opportunities for graduates include positions related to Romanian language and culture, and with the EU membership of Hungary and Romania a plethora of difficulties arose concerning language and communication, publishing, mass media, ministerial connections, foreign affairs and cultural relations, diplomacy, and tourism in particular.

### **Requirements:**

- BA degree in Romance studies with a French track or
- Equivalent college diploma or
- At least 50 credits of previous studies pertaining to the French track of Romance studies with a certificate of advanced language skills in French

<b>Tuition fee/semester</b>	<b>EU/EEA Students</b>	<b>non EEA Students</b>
	<b>850€</b>	<b>850€</b>

### **Way of application:**

To apply to the programme please contact the student advisor or the programme co-ordinator, listed below. You can find further information about the application and application forms at the following websites.

<http://www.btk.elte.hu/en/BA/foreign>, <http://www.btk.elte.hu/en/Alas-129>

**Application deadline: 20 August 2012**

**Name of the programme:** Russian Language and Literature

**Level of the programme:** MA

**Length of the programme:** 4 semesters

**Type of the programme:** Full time

**ECTS Credits:** 120

**Place of the programme:** Trefort Campus

**Start date of the programme:** 5. September 2012 – July 2014

**Organizational unit of Eötvös Loránd University:** Faculty of Humanities, Institute of Slavonic and Baltic Studies, Department of Russian Language and Literature

**Short description of the programme:**

The MA programme consists of a basic common part compulsory for everybody (68 credits) and an optional specialisation (22 credits). The basic part covers studies in descriptive and historical linguistics as well as in literary criticism, and it also contains language practice seminars. The MA programme gives an opportunity to choose from four different specialisations such as 1) Russian linguistics, 2) the history of Russian literature and literary criticism, 3) Russian literature–world literature comparative studies, 4) intercultural communication.

**Strengths of the programme:**

The structure of the MA programme is flexible, and the choice among the four kinds of specialisations fulfils the needs of students with various interests. From each specialisation students can go on to PhD programmes offered by the department (in Russian linguistics or Russian literature). The strength of the MA programme is indicated by the scientific achievements of the department staff (four professors have a DSc degree) and the professional career of the students who have already completed the MA programme. It is quite plausible that the labour market demands students from all these specialisations.

**Career opportunities:**

Apart from the education sector, the career opportunities of students with an MA degree in Russian language and literature embrace the economic, cultural, political, and social spheres as well.

**Requirements:**

BA in the Russian Language, at least medium state degree in Russian.

<b>Tuition fee/semester</b>	<b>EU/EEA Students</b>	<b>non EEA Students</b>
	<b>850 €</b>	<b>850€</b>

**Way of application:**

To apply to the programme please contact the student advisor or the programme co-ordinator, listed below. You can find further information about the application and application forms at the following websites.

<http://www.btk.elte.hu/en/BA/foreign>, <http://www.btk.elte.hu/en/Alias-129>

**Name of the programme:** Spanish language, literature, and culture

**Level of the programme:** MA

**Length of the programme:** 4 semesters

**Type of the programme:** Full time

**ECTS Credits:** 120

**Language of the programme:** Spanish

**Place of the programme:** Trefort Campus

**Start date of the programme:** 5 September 2012

**Organizational unit of Eötvös Loránd University:** Faculty of Humanities, Institute of Romance studies, Department of Spanish language and literature

**Short description of the programme:**

MA students shall participate in a thorough training in the Spanish language, literature, and culture. The curriculum can be found at the homepage. The MA is concluded by the preparation and successful defence of a thesis.

### **Strengths of the programme:**

During the training students will

- gain knowledge of contemporary questions in Spanish literature research (history of literature from medieval times up until present, hispanic literature, etc.)
- obtain practice in scientific literature analysis
- acquaint themselves with the methodology of literature research and gains experience in research
- delve into the various techniques of Spanish text composition
- improve oral skills in the foreign language
- get a deeper understanding of linguistics, study current fields of linguistic research (e.g., simultaneous linguistics, language history, descriptive linguistics, textual linguistics, lexicology, phraseology, sociolinguistics, etc.)
- practice translation

### **Career opportunities:**

MA level studies in humanities within the modern philology field, especially in the case of the Spanish studies which consider the needs of the labour market, tend to strive to produce professionals who meet the increasingly growing requirements of intellectual occupations mostly related to services (field of arts, social sciences track, journalism, text composition, translation, drafting of tenders, etc.), while at the same time prepare them for broader topics for assistant positions related to humanities. Furthermore, it is important to note the increasing demand for humanities graduates, irrespective of their study tracks, who are equipped with general knowledge, empathy, and high level of communication skills, for positions of deputy manager, expert of human policy, etc.

The training emphasises preparation for scientific research and provides an excellent opportunity to continue studies at the PhD level.

### **Requirements:**

- BA degree in Romance studies with a Spanish track or
- Equivalent college diploma or
- At least 50 credits of previous studies pertaining to the Spanish track of Romance studies with a certificate of advanced language skills in Spanish

<b>Tuition fee/semester</b>	<b>EU/EEA Students</b>	<b>non EEA Students</b>
	<b>850€</b>	<b>850€</b>

### **Way of application:**

**INFORMATION TECHNOLOGY**

**Name of the programme:** EIT ICT Labs Master School Security and Privacy

**Level of the programme:** MSc

**Length of the programme:** 4 semesters

**Type of the programme:** Full time

**ECTS Credits:** 120

**Language of the programme:** English

**Place of the programme:** Joint programme

**Entry points:**

- Technical University of Berlin, Berlin, Germany
- University of Trento, Trento, Italy

**Exit points:**

- Technical University of Berlin
- Eötvös Loránd University
- Technical University of Darmstadt, Darmstadt, Germany
- Saarland University, Saarbrücken, Germany
- University of Twente (3TU), Twente, Netherlands
- University of Trento, Trento, Italy

**Start date of the programme:** 3 Sept 2012 – 31 July 2014

**Organizational unit of Eötvös Loránd University:** Faculty of Informatics

**Short description of the programme:**

The dream education is now a reality - we are now launching the EIT ICT Labs Master School's programmes in ICT Innovation!

The ICT innovation programmes are unique in their combination of a technical major and a minor in Innovation & Entrepreneurship. Graduates receive double degrees and EIT ICT Labs certificates. Throughout the 2 year programmes there is provided funded travels to various European countries for kick-offs, winter camps and summer schools. The mobility feature also includes choosing an entry university for the first year and then for the second year another European top university where you will fulfill your master's thesis. Hands-on experience from guaranteed high level internships and a mentoring program with one of the leading research or business organisations committed to the EIT ICT Labs Master School are also essential ingredients.

### **Strengths of the programme:**

#### ***Advanced Cryptography (ELTE)***

*Description:* Security and Privacy are very important for citizens and customers using IT-based systems. The specialization focuses on the general ideas, techniques and methods of Applied Cryptography as well as on the theoretical background and solid knowledge, putting security in a wider context. Security and Privacy is considered both from the technological and from the economical point of view, which supports decisions in many practical cases.

#### *Learning Outcomes:*

Graduates are

- able to manage all the typical cryptographic challenges in IT-Systems
- able to develop cryptosystems under various circumstances
- aware of the theoretical and practical background.

### **Career opportunities:**

Successful graduates will easily find positions in companies that provide product services, such as Telecom companies, Financial Institutes, Software and Hardware vendors, et al, who require a high assurance in their ICT systems.

Graduates of the S&P major should also be in a good position to start their own company, providing product or technology development, business development or consultancy services.

Another career option is an advanced research career in industry and academy, including PhD education at the involved universities and at other top universities. Last but not least, the governmental security agencies lack a qualified pool of systems security engineers despite the hype about cyber attacks and security breaches that seem to flood the media.

### **Requirements:**

Applicants must have completed a Bachelor's degree encompassing a minimum of 180 ECTS credits or equivalent academic qualifications from an internationally recognized university.

A B.Sc. degree in computer science is the primary target group. Nevertheless, outstanding bachelor students from other disciplines, such as mathematics, electrical engineering, computer engineering, or information systems sciences with solid skills in mathematics, electrical engineering, software design and programming can also be accepted.

Students in their final year of undergraduate education may also apply and if qualified, receive a conditional offer. If you have not completed your studies, please include a written statement from the degree administration office (or equivalent department), confirming that you are enrolled on the final year of your education and giving your expected completion date. If you receive a conditional offer, you should present your degree certificate to the Admissions Office before 15 August 2012. Applicants following longer technical programmes and who have completed courses equivalent to an amount of 180 ECTS, will be considered on a case-by-case basis.

Applicants must provide proof of their English language proficiency, which is most commonly established through an internationally recognized test.

<b>Tuition fee/semester</b>	<b>EU/EEA Students</b>	<b>non EEA Students</b>
	<b>3000€</b>	<b>8000€</b>

Please note that the tuition fees do not cover all minor study-related costs, such as fees to student unions, at the respective universities. *Note that you do not need to pay an application fee for this application.*

### **Way of application:**

Note that all applicants need to submit a complete application package consisting of the following documents before 15 February 2012.

1. A signed cover sheet (generated from the web-based application at [www.universityadmissions.se](http://www.universityadmissions.se))
2. A duly certified copy of your bachelor's degree in original language and translated into English (Read more about conditional acceptance in case of ongoing studies).
3. A duly certified copy of your transcript of records in original language and translated into English. All courses taken must be included.
4. Proof of English proficiency.
5. A Curriculum Vitae including details on your academic and professional career.
6. A letter of motivation in which you prove your innovative potential. For this purpose we ask you to discuss or propose an entrepreneurial idea (1 page of summary, 2 additional pages for details).
7. A certified copy of passport or other kind of identification in English.
8. Two letters of recommendation (from professors of the most recently attended higher institution or recent employers).

Applications are processed in three steps:

1. Document legacy and eligibility control regarding academic background and English proficiency (KTH Admissions Office on behalf of the EIT ICT Labs Master School Office)
2. Control of specific admission requirements for each major applied for (Technical Major Programme Committee)

### 3. Ranking (Technical Major Programme Committee)

The ranking is based on a total evaluation of the following criteria:

- Suitability of acquired bachelor degree for intended study program
- Academic excellence (Quality and recognition of home university, Study success)
- Entrepreneurial excellence
- Innovative potential

Please be aware that becoming accepted to a technical major does not guarantee that you will be assigned to your mobility option preference. Selected applicants will be offered a study track based on preference and availability. If an applicant cannot be offered a seat in the preferred study track an alternative track will be offered.

Please note that the tuition fees do not cover all minor study-related costs, such as fees to student unions, at the respective universities.

*Note that you do not need to pay an application fee for this application.*

#### **Application**

**form:**

[http://www.inf.elte.hu/english/international\\_application/Lapok/Application.aspx](http://www.inf.elte.hu/english/international_application/Lapok/Application.aspx)

**Application deadline: April 30, 2012**

#### **Scholarships:**

EIT ICT Labs has reserved funding for scholarships covering personal expenses on the level of 9000 Euro per year and student. For the most highly ranked admitted students (as a minimum 30%), we will provide fee waivers.

**Scholarship application deadline: February 15. 2012**

#### **Way of application:**

The admission procedure for the EIT ICT Labs Master's Programme is organized centrally from Sweden by the KTH Admissions Office. Please read the admission requirements and application instructions before sending your documents.

Please note that applications after deadline will be accepted. Late applications will be processed subject to time, availability and resources.

The application consists of four steps:

- Create a user account in Nya, the web-based national Swedish admission system ([universityadmissions.se](http://universityadmissions.se)).
- Make a web-based application.
- Print cover sheet and send it with application documents to the address:
  - (1) University Admissions in Sweden
  - FE 1
  - SE-833 83 Strömsund
  - SWEDEN.
- Fill out the complementary information form.

In the application the student has to specify:

- Two technical majors in priority order
- Two entry point universities in priority order

Two exit point universities in priority order.

**Name of the programme:** EIT ICT Labs Master School Service Design and Engineering

**Level of the programme:** MSc

**Length of the programme:** 4 semesters

**Type of the programme:** Full time

**ECTS Credits:** 120

**Language of the programme:** English

**Place of the programme:**

**Entry points:**

Aalto University, Helsinki, Finland  
Eindhoven University of Technology, Eindhoven, Netherlands (TU/e)

**Exit points:**

Aalto University  
Eindhoven University of Technology  
Eötvös Loránd University (ELTE)  
University of Trento, Trento, Italy (UNITN)

**Start date of the programme:** 3 Sept 2012 – 31 July 2014

**Organizational unit of Eötvös Loránd University:** Faculty of Informatics

### **Short description of the programme:**

The dream education is now a reality - we are now launching the EIT ICT Labs Master School's programmes in ICT Innovation!

The ICT innovation programmes are unique in their combination of a technical major and a minor in Innovation & Entrepreneurship. Graduates receive double degrees and EIT ICT Labs certificates. Throughout the 2 year programmes there is provided funded travels to various European countries for kick-offs, winter camps and summer schools. The mobility feature also includes choosing an entry university for the first year and then for the second year another European top university where you will fulfill your master's thesis. Hands-on experience from guaranteed high level internships and a mentoring program with one of the leading research or business organisations committed to the EIT ICT Labs Master School are also essential ingredients.

### **Strengths of the programme:**

ELTE offers a specialization in *Distributed service systems* with thematic coupling to digital cities and health and wellbeing. The focus of the specialization is to support design, analysis and development of complex distributed telecommunication services. It includes courses on the development of distributed software, service-oriented integration, large-scale projects for analysis and development of complex telecom software, the analysis of distributed systems and process structure, the design of distributed systems, and the reverse engineering of complex software systems via static analysis.

### **Career opportunities:**

On entry level SDE graduates will qualify for jobs in the technical and business roles with typical titles being software engineer, software/information architect, systems engineer, business/service development manager, account manager, enterprise architect or consultant. The program provides also abilities to proceed to management and leadership positions on the international level.

Because of their experience in working with multidisciplinary projects the graduates are accustomed to act in open innovation settings where different users, business and social aspects and technologies come together. Due to strong drivers towards the service paradigm the graduates will find jobs not only in the software and ICT-sector but also in many other industries and public sector services like health care, logistics, energy, retail etc.

### **Requirements:**

Applicants must have completed a Bachelor's degree encompassing a minimum of 180 ECTS credits or equivalent academic qualifications from an internationally recognized university.

A B.Sc. degree primarily in computer science, software engineering, information systems, telecom or digital media, but not excluding other viable bachelor degrees from areas like engineering, economics, or industrial arts and design with some potential complementary computer science studies etc. mathematics and programming.

Students in their final year of undergraduate education may also apply and if qualified, receive a conditional offer. If you have not completed your studies, please include a written

statement from the degree administration office (or equivalent department), confirming that you are enrolled on the final year of your education and giving your expected completion date. If you receive a conditional offer, you should present your degree certificate to the Admissions Office before 15 August 2012. Applicants following longer technical programmes and who have completed courses equivalent to an amount of 180 ECTS, will be considered on a case-by-case basis.

Applicants must provide proof of their English language proficiency, which is most commonly established through an internationally recognized test.

**Name of the programme:** Computer Science, Software Information Technology

**Level of the programme:** MSc

**Length of the programme:** 4 semesters

**Type of the programme:** Full time

**ECTS Credits:** 120

**Language of the programme:** English

**Place of the programme:** Lágymányos Campus

**Start date of the programme:** 5 Sept 2012 – June 30 2014

**Organizational unit of Eötvös Loránd University:** Faculty of Informatics

### Short description of the programme:

The objective is to train the Computer Program Designer with a professional knowledge based on solid theoretical background, who have the skills to take part in program development, in developing information systems and system management in various areas. The Computer Program Designer often acts as a mediator between the customers of information systems and the producers. In this way, the job of a Program Designer synthesises the constructive activity of engineers with the general problem-solving attitude of mathematicians while participating in teams of large projects.

The program provides students solid theoretical background in various fields of Computer Science in combination with specialized work in computer and information processing techniques. Students learn the methodologies and techniques used in the development and implementation of computer systems.

### Strengths of the programme:

The high standard of training is guaranteed by the highly qualified academic staff. The teaching is supported by modern infrastructure and well equipped computer labs. The library of the Faculty contains several thousand volumes. The students of higher years and PhD students help the first year students in a mentor system to come over their first challenges at the university.

In addition to the high level of theoretical training, the Faculty's relationship with the business community, the joint research and development projects offer up-to-date practical knowledge and experience to the students. The Faculty has concluded bilateral agreements with numerous universities in the world, which allows the students to study one or two semesters or participate in research projects at a partner institution.

Extracurricular graduate research activities of the students are supported and supervised by leading scientists of the Faculty.

Workshops are also organized with international partners.

### **Career opportunities:**

Computer Program Designers are welcome in every sector of informatics. Jobs are offered by large international computer companies, outstanding Hungarian firms, banks, large enterprises, state institutions, software development companies, research institutes and universities, where they may be engaged in the preparation of integrated data processing systems, electronic trade transactions and electronic money transfers, solving telecommunication problems (networks, programming mobile phones), performing image recognition, computer-aided design, image processing or preparing multimedia applications.

### SCIENCE (MSc)

**Name of the programme:** Biology

**Level of the programme:** MSc

**Length of the programme:** 4-6 semesters

**Type of the programme:** Full time

**ECTS Credits:** 120

**Language of the programme:** English

**Place of the programme:** Lágymányos Campus

**Start date of the programme:** 5 Sept 2012 -

**Organizational unit of Eötvös Loránd University:**

[http://www.bio.elte.hu/engedu/MSc\\_bio/MSc\\_program.htm](http://www.bio.elte.hu/engedu/MSc_bio/MSc_program.htm)

#### Short description of the programme:

Students participate in intensive **advanced and high level courses** in the different fields of biology most relevant for their specialisation to inform them about the recent developments and frontline problems. Some **60% of the programme consists of practical hours** (spent on laboratory/field practice and on research) ensuring knowledge of state of the art methods. M.Sc. graduates will be able to participate creatively in research projects and recognise and handle complex problems through a multi-sided approach in planning and performing experiments. The knowledge obtained in the M.Sc. programme forms an excellent basis that is necessary for studies in a Ph.D. programme.

#### Strengths of the programme:

For students with a B.Sc. degree the minimum duration of the M.Sc. programme is four semesters. However, according to our experience, **six semesters** are normally needed to get the M.Sc. degree because the applicants' prior B.Sc. studies are different in both their curriculum and level from those found at Eötvös Loránd University (see the "[Curriculum of B.Sc. program](#)") making it necessary to complete a two-semester catch-up programme. The curriculum of this two-semester programme depends on the chosen M.Sc. Programme Specialisation as well as on the applicant's prior studies and knowledge in the chosen special field.

#### Requirements:

The successful applicant must have a **B.Sc. degree in Biology** and a good command of English. The applicant is interviewed during the application and admission procedure to elucidate the level of prior knowledge and to decide about the possible Programme Specialisation, which is chosen according to the applicant's preference and the opinion of the

interviewing professors. The interview can partially be carried out by distant methods such as electronic media and postal service. The final decision on the Programme Specialisation, tutor, thesis work, and other details is, however, made after a personal meeting and discussion with the applicant.

<b>Tuition fee/semester</b>	<b>EU/EEA Students</b>	<b>non EEA Students</b>
	3300€	4300€
<b>Other costs</b>		
Application fee	160€	160€
Registration fee	60€	60€

\*No registration fee is charged in the first semester

#### **Way of application:**

To apply to the programme please contact the student advisor or the programme co-ordinator, listed below. You can find further information about the application and application forms at the following websites.

#### **Scholarships/Discounts:**

At present Eötvös Loránd University cannot offer scholarships, however, we give a **20% fee reduction to our best B.Sc., M.Sc. and Ph.D. biology students**, from the second year on, determined by their performance in the previous year.

**Further information:** [http://www.bio.elte.hu/engedu/MSc\\_bio/MSc\\_program.htm](http://www.bio.elte.hu/engedu/MSc_bio/MSc_program.htm)

#### **Contact information**

Programme co-ordinator: ErikaTóth Ph.D. associate professor

E-mail address: [totherika@caesar.elte.hu](mailto:totherika@caesar.elte.hu)

#### **Student advisory service**

Name of the contact person: Timea Konczné Remler

E-mail address: [krtimea@ludens.elte.hu](mailto:krtimea@ludens.elte.hu)

Postal address: Pázmány Péter str. 1/A. Budapest, H-1117, Hungary

Telephone no.: +36-1-372-2584

Fax no.: +36-1-372-2567

**Name of the programme:** Chemistry

**Level of the programme:** MSc

**Length of the programme:** 4 semesters

**Type of the programme:** Full time

**ECTS Credits:** 120

**Language of the programme:** English

**Place of the programme:** Lágymányos Campus

**Start date of the programme:** 5 Sept 2012 -

**Organizational unit of Eötvös Loránd University:** Faculty of Science, Institute of Chemistry

**Short description of the programme:**

Students with a BSc degree follow the specialised section of the curriculum choosing one of the directions (sub-directions) of specialisation. Their curriculum is organised individually as described below. For students with a BSc degree the minimum official duration of the MSc programme is four semesters. However, according to our experience they usually need 6 semesters to get the degree. This is because due to differences between universities it is almost always necessary to develop the student's knowledge by taking catch-up programmes that are essential for the chosen special direction. With all other aspects of the work to prepare the thesis, the usual duration of studies for an MSc degree for students with a BSc diploma (from universities other than ELTE) can be expected to last for six semesters.

**Strengths of the programme:**

**Specialisation Modules:**

- [Chemical Informatics Module](#)
- [Environmental Chemistry Module](#)
- [Materials Chemistry Module](#)
- [Molecular Structure Studies Module](#)
- [Pharmaceutical Chemistry Module](#)

**Career opportunities:**

After completing their studies and having their thesis accepted the students are awarded an MSc degree. If a student fulfilled the requirements of a specialisation module a written statement on the specialisation is also issued. The MSc degree qualifies its holder to take up positions in the relevant fields and to enlist for further studies, including the studies for a higher (PhD) degree.

**Requirements:**

The successful applicant must have a **B.Sc. degree in Chemistry** and a good command of English.

<b>Tuition fee/semester</b>	<b>EU/EEA Students</b>	<b>non EEA Students</b>

**Name of the programme:** Middle European interdisciplinary master programme in Cognitive Science (MEi: CogSci)

**Level of the programme:** MSc

**Length of the programme:** 4 semesters

**Type of the programme:** Full time

**ECTS Credits:** 120

**Language of the programme:** English

**Place of the programme:** Three semesters (including the first two) at the Lágymányos Campus of the Eötvös University, Budapest, Hungary. One semester at one of the “partner” universities: University of Vienna, Vienna, Austria; Comenius University in Bratislava, Bratislava, Slovakia; University of Ljubljana, Ljubljana, Slovenia; University of Zagreb, Zagreb, Croatia.

**Start date of the programme:** September 2013 – July 2015

**Organizational unit of Eötvös Loránd University:** Faculty of Science, Department of History and Philosophy of Science

**Short description of the programme:**

MEi:CogSci is a (120 ECTS, 2 years) European joint master's programme, which is offered jointly by the following institutions: Comenius University in Bratislava, Eötvös Loránd University Budapest, Budapest University of Technology and Economics, University of Ljubljana, University of Vienna (coordinating institution), University of Zagreb.

The curriculum is conceptualized as a joint master's programme; i.e., ultimately a joint academic degree will be awarded by the participating institutions. The concept of a joint degree includes that each student has to study mainly at a home university (e.g. at the Eötvös University), but has to get 30 ECTS at one of our international partner universities (“a semester long student mobility”).

Cognitive science is an interdisciplinary project involving different scientific fields in science, technology, and the humanities, dealing with the phenomena of cognition – perception, reasoning, thinking, and behaviour – from an interdisciplinary perspective. Cognitive science grew out of the cybernetics movement in the 1950s and has seen a number of paradigm changes since and Anthropology, Artificial intelligence, Biology, Linguistics, Neuroscience, Philosophy, and Psychology have emerged as core disciplines.

Cognitive science and related study programmes have been implemented in many European countries just over the past ten years; the DFG (“Deutsche Forschungsgemeinschaft”/German Research Foundation) has determined cognitive science to be one of twelve most relevant areas of research.

**Strengths of the programme:**

This is an interdisciplinary study programme, which is challenging: Coming from one field, each student will have to gain insight into other major disciplines involved. Students will have to acquire the basics, gain insight into different experimental methods, and at the same time learn to engage in an interdisciplinary discourse and gain practical experience in

interdisciplinary work, partly in an intercultural environment. The goal is to educate researchers. Thus, "knowing a little bit of everything" will not suffice; students will have to gain profound conceptual knowledge as well as solid methodological research skills.

### **Career opportunities:**

The programme provides graduates with the necessary theoretical / intellectual and empirical tools to pursue an academic career (Ph.D. programme) in cognitive science or in one of the disciplines related to it. Apart from basic research graduates in cognitive science increasingly find work in applied research. Depending on the direction of specialisation, prospective career fields include the IT-sector (interaction design, usability, Computer Supported Cooperative Work, knowledge management, etc.), education, and biomedical and clinical research, as well as economy. The generic skills (such as teamwork, ability to communicate, reflection and evaluation skills, ability to quickly learn and adapt) acquired by graduates are of use in a variety of careers in the private sector. Graduates of cognitive science are especially suited to work in highly interdisciplinary area, bringing experience in mediating between disciplines. These include the fields of IT and education (see above), as well as the areas of consulting, human resources, and science writing.

### **Requirements:**

Admitted are students holding a bachelor or equivalent degree in cognitive science or one of its core disciplines (anthropology, biology, computer science, linguistics, medicine, neuroscience, philosophy, psychology).

For applications of students from other fields, the local advisory board must decide (and can prescribe up to 30 additional ECTS to be accomplished in the course of the programme).

Necessary documents:

- Bachelor-Certificate (or Letter of Reference from supervisor stating that you will receive your Bachelor degree by the end of September of this year)
- Information as detailed as possible regarding your study/studies: your Diploma Supplement, transcripts or Consolidated Grade Record
- Proof of English proficiency (for non native speakers)

<b>Tuition fee/semester</b>	<b>EU/EEA Students</b>	<b>non EEA Students</b>
	<b>3000€</b>	<b>4000€</b>
<b>Other costs</b>		
Application fee	140€	140€

### **Way of application:**

To apply to the programme please contact the student advisor or the programme co-ordinator, listed below. You can find further information about the application and application forms at the following websites.

**Further information:** <http://www.meicogsci.eu/>

**Application deadline:** 15 April 2013

**Way of application:**

1. Please print out and send both in electronic version of the “Eotvos University application form” (see below) to: [ropolyi@caesar.elte.hu](mailto:ropolyi@caesar.elte.hu)  
and in hardcopy format to

Laszlo Ropolyi

Department of History and Philosophy of Science, Eotvos University

1117 Budapest, Pazmany setany 1/c

Hungary

2. Together with the hardcopy application form please send the following documents (to the above address):

- a “MEi: CogSci application form” (incl. CV & Letter of Motivation) (in English)

[http://www.meicogsci.eu/wiki/File:MEiCogSci\\_Application\\_Form\\_VIE.doc/](http://www.meicogsci.eu/wiki/File:MEiCogSci_Application_Form_VIE.doc/)

- Bachelor-Certificate (or Letter of Reference from supervisor stating that you will receive your Bachelor degree by the end of September of this year)

- Information as detailed as possible regarding your study/studies: your Diploma Supplement, transcripts or Consolidated Grade Record

- Proof of English proficiency (for non native speakers)

Fax no.: +36-1-3722924

**Name of the programme:** Postgraduate Master Course in Forensic Science

**Level of the programme:** MA

**Length of the programme:** 2 semesters

**Type of the programme:** Full time

**ECTS Credits:** 60

**Language of the programme:** English

**Place of the programme:** Lágymányos Campus

**Start date of the programme:** 5 September 2013 – July 2014

**Organizational unit of Eötvös Loránd University:** Faculty of Science, Institute of Chemistry, Department of Analytical Chemistry

**Short description of the programme:**

The Eotvos Lorand Tudomanyegyetem Budapest (Hungary), , in cooperation with the Università degli Studi di Parma (Italy) the Brandenburgische Technische Universität Cottbus (Germany) and the Università degli Studi di Messina (Italy), under the framework, and with the financial support, of the LLP Programme (Project number 142638-LLP-1-IT-ERASMUS-ECDCE) set for the academic year 2009/2010 the Pilot Course of the European Postgraduate Masters in Forensic Sciences (EUROFOS)".

**Strenghts of the programme:**

In particular, graduates in technical and scientific fields, (Sciences, Pharmacy, Engineering and Medicine) will take part, as experts, in the criminal trial with an official specific qualification. Those experts will find the appropriate collocation in the law-field on the basis of the actuated reform of the Criminal Procedure Code (according to the law n.397, in date, 7/12/2000) that allows the Defence and the Part that bring a civil action in the criminal proceedings to make investigations and analysis on the exhibit.

The graduates in law will learn to handle in a more efficient way the surveys, to identify the best techniques and the best analysis laboratories, to better read and comprehend the surveys without restrict themselves to read the bold conclusion making a comparison between surveys in contrast.

The specializing graduates in Legal Medicine will integrate their professional criminal knowledge learning to use the information issued from the physic techniques to identify the necroscopy purpose.

Specific educational aims:

For the graduates in Technical-scientific fields:

- Knowledge of Criminal Procedure Law;
- Knowledge of theory and practical technique of the Criminal analysis;
- Knowledge of the exposition technique for an operative deposition in the Court session;
- or the gradates in Law
- Knowledge of theory and practical technique of the Criminal analysis in the Criminal Procedure context;
- Knowledge of the exposition technique in the technical-scientific jargon;
- Evaluation of the clue probationary power;

The specializing graduates in Legal Medicine will learn to use the information of the physic techniques to better individuate necroscopy aims. The graduates in Political Sciences and Sociology, Psychology and Investigation Sciences will become security operators on the crime scene able to conduct investigations based on the scientific and technical aid.

## **Career opportunities:**

The Postgraduate Masters Course awards successful students with the following qualifications:

- Postgraduate Certificate in Forensic Sciences (Eotvos Lorand University, Budapest)
- Master di 2° Livello in Scienze Forensi (issued by the University of Parma and the University of Messina)
- Certificate in Forensic Sciences (Brandenburg University of Technology Cottbus)

The Postgraduate Masters aims to educate and train the following professional profiles:

- Lawyers and judges expert in criminal sciences;
- Forensic experts in law discussions concerning Court expertise;
- Graduated professionals already operating in the field of forensic disciplines aiming to raise their professional profile through a European compared approach to the study of Forensic Sciences.

## **Requirements:**

EUROFOS is open to students from all Countries. Students coming from non-EU or non-EFTA Countries are invited to contact the Office of International Relations of the University of Parma ([relint@unipr.it](mailto:relint@unipr.it)) in order to receive adequate instructions to access the Postgraduate Masters in Forensic Sciences.

EUROFOS has a planned number of admitted participants fixed in minimum 20 and maximum 30 students.

Access to the EUROFOS requires completion of a selection procedure based on the assessment of qualifications by the EUROFOS Committee, formed by members coming from all partner institutions. The following requirements are considered for selection:

MA, MSc, four-year degree or equivalent level in one of the following subjects: Natural and Biological Sciences, Agriculture, Chemistry, Pharmacy, Engineering, Law, Political Sciences, Sociology, Psychology, Applied Criminology, Crime and Safety, Biotechnology, Dentistry. Graduates in Medicine can be also admitted provided the applicants have a specialisation in Legal Medicine. Other degrees will be subject to case-by-case evaluation on behalf of the Master Executive Committee.

Good knowledge of English language. In order to allow a proper evaluation of this requirement, the possession of one of the following certificates is considered as preferential:

- IELTS 5.5
- TOEFL 500
- TOEIC 355
- Cambridge Proficiency Pass (C)
- GCE O level/GCSE 3
- JMB Text Overseas Students 3
- Cambridge Advanced Exam Pass

- London Chamber of Commerce Level III
- International BAC Higher
- UNICERT III
- Official declaration, issued by the University of graduation, stating the candidate's knowledge of English language EQUAL or HIGHER than C1 European level.

According to the Country of origin of the applicant, the further additional documents are required, please check the programme website for further information.

<b>Tuition fee/semester</b>	<b>EU/EEA Students</b>	<b>non EEA Students</b>
	<b>2500 €</b>	<b>2500 €</b>

#### **Way of application:**

On the basis of the list made available, as official registration, the admitted candidates must submit the following documents to the address given below:

Eotvos Lorand Tudományegyetem Budapest

To the courtesy of: Prof. Dr. Gyula Zaray

Department of Analytical Chemistry, Pazmany Peter setany 1/a., H-1117, BUDAPEST, Hungary

**Application deadline:** 18 December 2012

**Registration form**, downloadable from <http://www.eurofos.eu> or <http://ttkto.elte.hu/forensic>

### **SOCIAL SCIENCES (MA)**

**Name of the programme:** Ethnic and Minority Studies Program

**Level of the programme:** MA

**Length of the programme:** 4 semesters

**Type of the programme:** Full time

**ECTS Credits:** 120

**Language of the programme:** English

**Place of the programme:** Lágymányos Campus

**Start date of the programme:** February 2013 – January 2015

**Organizational unit of Eötvös Loránd University:** Faculty of Social Sciences, ELTE-UNESCO Minority Studies Department

**Short description of the programme:**

The Ethnic and Minority Studies Master Programme deals with minority issues and ethnic diversity in the region of Eastern and Central Europe with regard to the integration process of the countries of the region into the international community of the European Union. The serious ethnic conflicts of the region, the demand for countries to meet European norms in the field of minority issues, the increase in migration, and the simultaneous growth of xenophobia, anti-Semitism and homophobia, all contribute to a pressing need in Eastern and Central Europe for highly trained professionals with the insight and expertise to identify the main political, social, and psychological reasons behind tensions and discriminations, and who are also equipped with the skills and techniques to handle and moderate these conflicts. Thus, it is a key function of the Programme to provide the expertise necessary for such efforts in Europe while on the other hand, much of the research analyses, the scientific methods, as well as the 'Eastern and Central Europe experiences' has relevance for those who study ethnicity, race, and majority-minority relations elsewhere in the world.

**Strengths of the programme:**

The programme offers a systematic study of inter-ethnic relations, minority problems, and processes in post-communist societies within a comparative perspective. Moreover, it provides background knowledge behind major trends in economy, politics, society, social policy, social geography, and social psychology of the countries in the region. It introduces students to basic skills which are necessary not only to understand but to intervene in inter-group conflicts likely to occur in ethnic communities, urban neighborhoods, industrial workplaces, political organisations, trade unions, mass media, etc. In the curricula of the programme theory, research experiences, applied knowledge, and intervention skills are joined together to provide a unique interdisciplinary academic opportunity and a 'training-ground' for future minority policy experts. As a benefit of expected international participation, the programme creates an international community of students who speak English and come mainly from countries where problems of ethnic and minority relations are rampant. Consequently, various viewpoints can evolve and therefore a specific balance of the student body is promoted. Extra-curricular activities have been designed to place students in various internships where they become acquainted with real-life minority situations, to offer field-trips for more direct experiences, and to introduce students to an active research culture in a supportive framework.

### Career opportunities:

The modern principle of multiculturalism, protection of minority rights, equal opportunities, anti-discrimination, and new challenges of inter-cultural integration of modern societies request more and more academics who intend to carry out research or teach about ethnic diversity and inter-ethnic relations. In post-industrial welfare societies there is a growing need for policy makers or expert advisors in issues and conflicts between regions, nations, ethnic groups, minorities, and majorities in Hungary and various parts of Europe. There is a considerable need for these types of professionals today, and this demand in the future will further increase as the historical legacy of Eastern and Central Europe, the renaissance of the national spirit, the intense immigration, and frequent ethnic and minority conflicts make the task of managing and reducing ethnic tensions increasingly important. Graduates are expected to find jobs in the different public or private agencies like in public (governmental) organisations and the minority self-governments, in public education, in research institutes, in the media, in civil organisations and NGOs, and in all such programmes and projects that aim to promote the successful social and cultural integration of minorities into the dominant society.

### Requirements:

Full credit acknowledgement: Bachelor degree in social studies/sociology/ social work/ political science/cultural anthropology

Advanced English language knowledge

In case of other bachelor degrees: individual consideration

<b>Tuition fee/semester</b>	<b>EU/EEA Students</b>	<b>non EEA</b>
<b>Students</b>	<b>1200 €</b>	<b>1200€</b>

## **LAW AND POLITICAL SCIENCES**

**Name of the programme:** The Doctorate in Cultural and Global Criminology (DCGC)

**Level of the programme:** PhD

**Length of the programme:** 3 years (6 semesters)

**Type of the programme:** Full time

**ECTS Credits:** 180

**Language of the programme:** English

**Place of the programme:**

University of Kent, University of Hamburg, ELTE University, Utrecht University as agreed in the mobility pathways

**Start date of the programme:** 2013 – 2016

**Organizational unit of Eötvös Loránd University:**

Faculty of Legal and Political Sciences

Department of Criminology

**Short description of the programme:**

The nature and complexity of crime requires a committed, coherent interdisciplinary approach harnessing the most advanced international, cultural and critical insights of social sciences and law in a new doctoral training programme. The programme aims will meet six key needs in criminological doctoral research and training:

- Understanding and responding to new crimes
- Developing an international and intercultural outlook on crime and social harm
- Interdisciplinary criminology
- Intersectoral perspectives and expertise
- Citizenship
- Third-country capacity-building

The DCGC is a collaborative, three-year postgraduate research programme culminating in the submission of a doctoral thesis. Candidates will follow a main mobility path between two co-supervising universities, spending at least a year in each. The first semester will take place at Kent and at the end of the second semester a core compulsory training in specialist social-scientific and

legal qualitative-research methods will take place at a Summer School in Utrecht. Each candidate will have a team of supervisors (minimum two) from the two partners at which the main periods of mobility and research will be undertaken. It is divided into three main strands: research, subject-specific training and transferable skills training (courses, Common Study Programme presentations, the option of a research internship at an associate member of the consortium).

### **Strengths of the programme:**

The Doctorate in Cultural and Global Criminology (DCGC) is a structured PhD programme *offered jointly* by the University of Kent, Eötvös Lorand University (ELTE, Budapest, Hungary), the University of Hamburg (Germany), and Utrecht University (Netherlands). Applicants to the programme will be selected on the basis of *high academic achievement*, the fit of their research project with the DCGC research themes, and an assessment of their potential and commitment to complete *high quality research*. The Doctorate in Cultural and Global Criminology (DCGC) will develop a *politically engaged, international understanding and approach to crime and its control*, and prepare high-level doctoral candidates to work in the widest range of employment arenas concerned with understanding, preventing and responding to crime in a way which takes account of the global and cultural context. European criminology has been based either within the social sciences or in law, DCGC combines their best aspects in *structured, inter-disciplinary, and international* doctoral training programme. DCGC offers the opportunity for *international criminological research* about the problems and issues faced by civil society and the public sector. *The general research facilities in each institution are of a high quality*, with the full range of library facilities, campus networks, technological support, research software, international databases, and dedicated office space and IT equipment available for candidates. The consortium has established formal links with a *wide range of associated members*. These international stakeholders will be involved with the consortium, in proposing and supporting individual research projects relevant to their field, providing internships and work placements appropriate to the individual and his/her project, and involvement in programme governance.

### **Career opportunities:**

The personal development and career planning embedded in the programme will ensure that doctoral graduates will have focused on their career objectives and be well-prepared for work in the academic world, research, high-level policy, as consultants, and in regional, national, international, government positions, NGOs, research institutes, and criminal justice agencies. The mobility and the overall intercultural perspectives required by the programme will ensure that doctoral graduates will bring considerable added value to any organisation in which they work – not only through the qualities, skills and competences, including those of global-critical citizenship, which they have developed but also their innovative interdisciplinary cross-cultural perspectives.

### **Requirements:**

- 2<sup>nd</sup> cycle degree with the best or second best grade available in the national system in social sciences, law or related field (if applicants does not possess the required formal education, they will have to submit a dossier detailing relevant experiences and other attainments)

- non-native speakers of English must demonstrate proficiency in English at CEFR (Common European Framework of Reference for Languages) level C1 ('proficient user')

### Way of application:

Applicants to the programme will be selected on the basis of high academic achievement, the fit of their research project with the DCGC research themes, and an assessment of their potential and commitment to complete high quality research. Candidates will need to demonstrate their eligibility and academic achievement through the submission of relevant documentation, including:

- detailed transcripts with grades and degree classification
- a current CV
- a certificate of language ability
- a statement of purpose/motivation
- a research proposal including justification of the proposed mobility pathway
- the names of two referees who will attest to the applicant's academic standing and potential

All candidates will also be expected to indicate that they have understood, and are committed to, the integrated mobility requirement of the programme.

**Tuition fee/semester**    EU/EEA Students    non EEA Students

**6000€**

**10.500€**

### Other costs

For this information applicants are kindly invited to visit [www.dcg.eu](http://www.dcg.eu)

### Scholarship opportunities:

Two different Erasmus Mundus Fellowships can be awarded to DCGC doctoral candidates.

**Category A Fellowships** can be awarded to non-European (i.e. not from the 27 EU member states, plus Iceland, Norway and Liechtenstein) doctoral candidates selected by the DCGC who are not residents nor have carried out their main activity (studies, work, etc.) for more than a total of 12 months over the last five years in one of these countries (from 1st March 2007 onward, in this round of applications to the DCGC).

**Category B Fellowships** can be awarded to European (i.e. from the 27 EU member states, plus Iceland, Norway and Liechtenstein) doctoral candidates selected by the DCGC as well as to any doctoral candidates selected by EMJD consortia who do not fulfil the Category A criteria defined above.

**Application deadline:** The deadline for all applications in the Fellowship round is **16th January 2013, 23.59pm GMT**. No applications for Fellowships will be accepted after that date.

The application is web-based and managed by the University of Kent admissions system. The steps of the application process are listed on the DCGC website ([http://www.kent.ac.uk/sspsr/dcg/public\\_html/apply\\_process.html](http://www.kent.ac.uk/sspsr/dcg/public_html/apply_process.html)).

All applicants will be notified by email whether they have been selected for interview or not within two days of **3rd February 2013**.

The interview will take place on **8th and 9th February 2013 (UK time zone)**. **Candidates will need to ensure their availability for a skype or equivalent interview on this day.**

After these interviews, successful applicants and reserve applicants will be notified and asked to confirm that they are willing to accept a place on the DCGC programme. At the same time applicants placed on the reserve list will be notified and asked to confirm that they are willing to remain on the reserve list.

On **28th February 2013** the main and reserve lists of candidates submitted to EACEA for approval.

### **DOCTORAL (PH.D.) PROGRAMMES IN HUMANITIES**

**Length of the programmes:** 3 years + approximately 1 year: doctoral procedure (comprehensive exam and defence)

**Type of the Programmes:** 3 years Full Time + Part time (doctoral procedure)

**ECTS Credits:** 180

**Place of the programmes:** Trefort Campus

**Start date of the programmes:** 5 September 2012 –

**Short description of the programmes:**

The **68 PhD programmes** offered at present are part of 6 larger units known as Doctoral Schools. Proof of the exceptionally high standard of education is the ever-growing interest in our programmes. Our Faculty occupies a leading position in almost all fields, and is in many cases the only institution providing a particular programme not only within Hungary, but throughout Eastern Europe, and thus accounts for the development of specialists within that field in the whole region. Foreign students take part in the doctoral programmes via a tutorial system. During their PhD studies students have to collect 180 credits. The programmes are divided into three larger modules. The aims of the courses are to immerse students in their specialised field of study, to endow them with the research methodology needed for an academic career, and to develop their qualities as teachers and researchers. By fulfilling the publication requirements students become part of Hungarian scientific life. Since the use of international reference literature is a requirement, our students are expected to be proficient in at least one foreign language.

To obtain a PhD, students have to take a successful comprehensive exam at the end of their studies and defend their dissertation in a public debate.

The international agreements between universities and the diverse international academic relations of the supervising teachers provide outstanding students with the opportunity to partake in foreign research programmes or to complete their doctoral studies in the so-called Cotutelle form.

The doctoral schools frequently organise student conferences which serve as excellent forums for talented students to present the results of their independent research and to develop the academic skills indispensable for a future scientist.

The students work on their dissertation topic under the guidance of an established member of Hungarian academic life. In these scientific workshops they become acquainted with the latest international developments in their field of study (secondary literature, methodology, research).

Feedback proves that those who have obtained a PhD at our Faculty are highly trained academics with a profound knowledge of their subject areas, well-equipped to continue their research both in Hungary and abroad.

## **Doctoral School of Literary Studies**

American Studies

Comparative Literary Studies

Folklore and Literature of Uralic Peoples

French Literature from the Enlightenment to the Present

French Literature from the Middle Ages to the Enlightenment

**Name of the programme:** German literary and linguistic studies

**Level of the programme:** PhD

**Length of the programme:** 6 semesters

**Language of the programme:** German

**Place of the programme:** Trefort Campus

**Start date of the programme:** 5 September 2012

**Organizational unit of Eötvös Loránd University:** Faculty of Humanities, Institute of Germanic studies, Department of German language and literature

### **Short description of the programme:**

German literary studies doctoral programme

The PhD programme conducts research in the field of German literature in the following, closely related, diachronically articulated areas:

- literature and culture: Interculturality, the study of its phenomena in the various discourses of culture with special attention to literature as well as relation to other cultural discourses (comparatistics, intercultural connections)
- research in literature theory, especially narration theory and its bearing on analysis, and theories of intertextuality and intermediality and their application in text analysis
- research of the relationship between interculturality and language use including the analysis of various processes in the history of different cultures: the regional culture of German literature and literary life
- research in the sociology of literature
- the relationship between culture, literature, and regionality
- the clash between “own” and “alien” culture, research in topics of imagology
- effects of discourses of art within the system of culture from a synchronic and diachronic aspect: branches of fine art and literature in the culture of German-speaking areas and the Northern Lowlands

#### German linguistics doctoral programme

The PhD programme offers quality postgraduate training in the field of German linguistics. One of the principles of the programme is that the curriculum is to contain language philosophy and other philological modules. Research carried out at the department and the PhD training is closely intertwined with special attention to the fields of grammatology, contrastive linguistics, lexicology and semantics, dialectology and sociolinguistics, and applied linguistics.

#### **Strengths of the programme:**

The PhD programmes offer thorough and broad insight into the areas of contemporary literary and linguistic science. The curriculum allows for individual interests to be explored and pursued. The training attributes great importance to Hungarian and German literary, linguistic, and cultural connections and interactions. Students have the opportunity to join research activities conducted at the institute.

#### **Career opportunities:**

Scientific career with important positions in the various fields of cultural and scientific life.

#### **Requirements:**

MA degree with good grades, 2 certificates of language proficiency, written draft of the chosen topic, oral discussion entrance examination.

<b>Tuition fee/semester</b>	<b>EU/EEA Students</b>	<b>non EEA Students</b>
	350€	2200-3100 €

#### **Way of application:**

To apply to the programme please contact the student advisor or the programme co-ordinator, listed below. You can find further information about the application and application forms at the following websites.

**Application deadline:** 19 August 2012

**DOCTORAL (PH.D.) PROGRAMMES IN SCIENCE**

**Length of the programmes:** 3 years + approximately 1 year: doctoral procedure (comprehensive exam and defence)

**Type of the Programmes:** 3 years Full Time + Part time (doctoral procedure)

**ECTS Credits:** 180

**Place of the programmes:** Lágymányos Campus

**Start date of the programmes:** 5 September 2012

**Short description of the programmes:**

The aim of the doctoral training is to prepare students for academic research and lecturing activities and to provide them with opportunities for further academic training. There are 6 PhD schools and 26 programmes to choose from. The PhD programmes run parallel to those taught at the undergraduate level. The duration of studies is 3 years. During this period the chosen topic is researched with the guidance of a supervisor, organised courses are given and in order to obtain a PhD degree the student has to take a final examination and submit a thesis, written on their special topic.

**Strengths of the programmes:**

Since 1993 the Faculty of Science runs PhD programmes in all branches of natural sciences. PhD programmes are organised into PhD schools (Biology, Chemistry, Earth Sciences, Environmental Sciences (since 2006), Mathematics and Physics) approved by the National Accreditation Board. The high scientific standard of the PhD training is guaranteed by members of the Hungarian Academy of Sciences, Doctors of the Hungarian Academy of Sciences as well as many other PhD holders taking part in the programme as lecturers, supervisors or school/programme leaders. Many internationally acknowledged scientists and experts participate in the work of the PhD schools as lecturers of short courses and seminars.

### **Career opportunities:**

Career options include a broad spectrum of academia, industry, NGO and consulting positions in the given field of science.

### **Requirements:**

Only students holding a Master degree are eligible to attend doctorate courses. A B2 level language exam is required to begin the PhD training, while an additional B1 level language exam is required for gaining a PhD. (Actual language list among the bylaws of the doctoral schools, see [www.doktori.hu](http://www.doktori.hu) or [teo.elte.hu](http://teo.elte.hu) for details)

<b>Tuition fee/semester</b>	<b>EU/EEA Students</b>	<b>non EEA Students</b>
in case research is done at ELTE Faculty of Science	1820 €	2200€
in case research is done outside ELTE Faculty of Science	333€	2200€

### **Other costs**

Application fee	35€	35€
Registration book for non state-financed students	20 €	20€
Late registration book submission	10€/week	10€/week
Re-issuing registration book	40€	40€

### **Way of application/ student selection:**

Application packages have to arrive at ELTE Faculty of Science, Department of Scientific and International Affairs until deadline

Details on application at: [www.felvi.hu](http://www.felvi.hu)

**Application deadline:** 31th May 2012

Application form can be found online at: <http://teo.elte.hu/phd/FileS/downloads/ELTE-TTK-TEO-SZDK-JEL-F-E.pdf>

Criteria for ranking at admission audition include:

- previous university achievements (examinations, comprehensive examinations, qualification of degree),
- achievements related to previous research work (awards obtained in students' academic circles, publications in the particular field of profession),
- the feasibility of the research programme.

The Faculty's doctoral council decides of acceptance or rejection on the grounds of the Admission Committees reports done following the auditions.

The resolution regarding admission or rejection is posted by the Department of Scientific and International Affairs.

The admission resolution does not create a student status in itself, only the enrolment at the University personally establishes the student status.

**Scholarships/Discounts:** EEA students may apply for state-financed status

### **SHORT-TERM PROGRAMMES**

- Central Europe and the Great Powers in the 19<sup>th</sup> and 20<sup>th</sup> Centuries
- Characteristics of the Rise of Modern Hungary in the 19<sup>th</sup> and 20<sup>th</sup> Centuries
- Cold War Studies
- Contextualizing East-Central Europe: Hungary's Cultural Identity
- Cultural Diplomacy: Central Europe and the English-speaking World
- Drama and the Theater: a Practical and Theoretical Approach from a European Perspective
- Ethics and Philosophical Psychology
- Genre and Informational Technology of Avantgarde Literature
- Inditerdisciplinary Researches in the Context of Language
- International Relations and Globalization in the 19<sup>th</sup> and 20<sup>th</sup> Centuries
- Introduction to Russian Studies
- Irish Studies (History, Literature and Culture)
- Language and Mind
- Movie-making
- Nationalism Studies
- The Renaissance in Central Europe (Arts, Literature and Philosophy)
- The World Outside Europe at the Turn of the Millennium

## Short-term programs in Humanities for International Students

Students can choose from a large variety of short-term programs:

- Central Europe and the Great Powers in the 19<sup>th</sup> and 20<sup>th</sup> Centuries
- Characteristics of the Rise of Modern Hungary in the 19<sup>th</sup> and 20<sup>th</sup> Centuries
- Cold War Studies
- Contextualizing East-Central Europe: Hungary's Cultural Identity
- Cultural Diplomacy: Central Europe and the English-speaking World
- Drama and the Theater: a Practical and Theoretical Approach from a European Perspective
- Ethics and Philosophical Psychology
- Genre and Informational Technology of Avantgarde Literature
- Inditerdisciplinary Researches in the Context of Language
- International Relations and Globalization in the 19<sup>th</sup> and 20<sup>th</sup> Centuries
- Introduction to Russian Studies
- Irish Studies (History, Literature and Culture)
- Language and Mind
- Movie-making
- Nationalism Studies
- The Renaissance in Central Europe (Arts, Literature and Philosophy)
- The World Outside Europe at the Turn of the Millennium

The Faculty of Humanities of Eötvös Loránd University (ELTE BTK) invites international students to apply to its **tuition-based foreign-language short-term programs** for the academic year 2012/2013, within an ECTS-compatible credit system, beginning on 13 February 2013 (Spring Semester) and in September 2013 (Fall Semester).

**Additional short-term programs** are approved and announced on a regular basis. Keep checking our website or enquire with the enthusiastic International Student Office team about further details by sending an e-mail to [international@btk.elte.hu](mailto:international@btk.elte.hu) (Mr. Rudolf Sárdi, Head of International Operations of the Faculty of Humanities).

**Duration of studies and number of credits:** 1 or 2 semesters, 30 credits

**Tuition fee: 950 €** (both for EU and non-EU citizens)

Upon completing the program students will receive a **transcript** of their studies signed by the Dean of the Faculty (with an English seal). The credits obtained during the course may be incorporated into future university studies.

### Application process:

If you wish to apply for a short-term programme, you will have to send all your application materials by e-mail to the International Student Office (Mr. Rudolf Sárdi, e-mail: [international@btk.elte.hu](mailto:international@btk.elte.hu)).

**Application materials checklist:**

- a scanned copy of your **passport's biodata page** (in pdf format);
- a fully completed **Short-Term Application Form** (downloadable from Application Forms)

Save a copy of the Application Form under your name, type in all the requested information and send it to the above e-mail address as a Word document (.doc or .docx). Note that you will have to sign the document in person following your arrival in Hungary.

- a **Curriculum Vitae** in English or in the target language (no longer than one page, in Word format with one low resolution photo pasted in the top righthand corner);
- an official copy of completed secondary education or highest BA (Bachelor of Arts) degree you hold (scanned, in pdf format);
- proof of language knowledge (scanned, in pdf format).

Please note that no additional documents are required by the International Student Office. We therefore kindly ask you to send us the materials indicated above.

**Language requirements:** a certificate stating that the applicant can read, write, speak and understand English or the language of tuition at an advanced level.

***Process of selection:***

Once you have duly applied for the program of your choice, your application will be evaluated by the program leaders.

Applicants will immediately receive an e-mail of acknowledgment, confirming that their application materials have been duly received.

Once your documents have been considered in the selection process, a **Letter of Acceptance** or a **Letter of Refusal** will be sent out to your postal address as a registered air mail / priority letter shortly afterwards (within 30 days). A scanned copy of this letter will also be forwarded to you electronically.

After you have received your Letter of Acceptance, further notification will be sent to you electronically on the following:

- settling payment (transferring the tuition fee)
- further instructions on documentation (if appropriate)
- the date when the courses start
- the date before which the applicants must arrive in Hungary
- accommodation possibilities
- general information on Budapest and Hungary

**Important notice:** all short-term courses are launched with a minimum number of 7 applicants.

**Course descriptions and further details** are provided at [www.btk.elte.hu/en](http://www.btk.elte.hu/en) (under "Short-term programs")

Contact person: Mr. Rudolf Sárdi  
E-mail address: [international@btk.elte.hu](mailto:international@btk.elte.hu)  
Phone: +36 1 411 6500 / 5473 ext.
