	in case research is done outside ELTE Faculty of Science	333 €	2 200 €			
	Doctoral School of Mathematics				140 €	120 €
	in case research is done at ELTE Faculty of Science	1 820 €	2 200 €			
	in case research is done outside ELTE Faculty of Science	333 €	2 200 €			
	Doctoral School of Physics				140 €	120 €
	in case research is done at ELTE Faculty of Science	1 820 €	2 200 €			
	in case research is done outside ELTE Faculty of Science	333 €	2 200 €			

\* application and/or registration fees. Both EU/EEA and Non-EU/EEA students pay the same costs.  
 For Doctoral Programmes in Science, there are a few additional costs as well. For more information, please contact the relevant faculties.  
 \*\* upon request. The single room costs 160 € while the double room costs 140 € for a month.  
 \*\*\* upon request

# ACADEMIC PROGRAMMES FOR INTERNATIONAL STUDENTS

Eötvös Loránd University (since 1635)

- No. 1 university in Hungary
- More than 375-year-old tradition
- Cutting edge research Projects
- Leading Academics, Excellent Education
- Ample Opportunities to Study Abroad
- Successful Graduates around the World
- Welcoming Environment, Student Services
- First-class Facilities
- Safe atmosphere
- Alumni-club for former and current students

### Welcome to Eötvös Loránd University

Eötvös Loránd University (abbreviated as ELTE) - in terms of student and staff number, quality of education and research, its international relations and prestige - is an elite institution of state higher education in Hungary, which has been operating since 1635.

In an ever-changing Hungarian and international environment the main objective of Eötvös Loránd University is to preserve its traditions and at the same time to meet the challenges of modern times and become the regional centre of higher education, research and development in Central Europe.

The university offers a wide range of facilities and several degree programmes in English, French, German, Italian, Spanish and Russian to its international students. The quality of these degree programmes and the high prestige of our degree can guarantee that Eötvös Loránd University remains a prominent institution, a landmark in Hungarian and international higher education in the 21st century.

We look forward to welcoming you to our university!

### PROF. DR. BARNA MEZEY

Rector  
Eötvös Loránd University

### History of Eötvös Loránd University

Eötvös Loránd University is the oldest and largest university of Hungary. It was founded in Nagyszombat (today Trnava, Slovakia) in 1635 by Péter Pázmány, the Archbishop of Esztergom, who entrusted the Jesuit order with the governance of the university. After the dissolution of the Jesuits, the university was moved to the Royal Palace in Buda, in accordance with the original wishes of Péter Pázmány. In 1784, however, it was moved to Pest.

The most intensive period of development started in 1867 after the Austro-Hungarian Compromise, which resulted in the establishment of the Austro-Hungarian Monarchy. At that time the staff included not only outstanding European lecturers but also world famous scientists. At the turn of the century ELTE was one of the 15 largest universities in the world.

In 1950, the university adopted the name of Eötvös Loránd (1848-1919), a professor of Physics of international repute (notably for his work on the equivalence of gravitational and internal mass). In the course of the structural reorganisation of the university in 2003, three new faculties were opened: the Faculty of Informatics, the Faculty of Education and Psychology, and the Faculty of Social Sciences.

### Services

#### University Library

Study and research are supported by the faculty libraries and the renowned University Library founded in 1561, making it the oldest standing library in Hungary. Today, the holdings of the University Library amount to 2 million titles, over 200,000 journals, 600 online periodicals, and 100 databases on the internet. Besides the traditional library services, such as lending, interlibrary loan and copying, the Library provides access to e-text archives, online copies of printed documents, electronic-only materials and CD-ROMs.

#### Student Services

In order to make foreign students settle in quickly and more easily, and to make their experience as good as possible, ELTE operates a mentor system. The scheme allocates native students to foreign students, thereby acquainting them with each other and ensuring that the new candidates from abroad enjoy the benefits of being guided by senior students.

#### Career Service Centre

The Career Service Centre helps students learn practical skills during their studies. ELTE understands the importance of such skills and as the labour market seeks more and more versatile and skilled people, the need to give students the edge over others who only receive theoretical knowledge grew to the extent where the creation of the centre was highly desirable. The Centre provides workshops, career management trainings and personal guidance from trained career counsellors. It assists students and alumni in finding employment and informs them about voluntary works and internship opportunities.

### Hungarian Language Courses, Cultural and Sport Activities

Furthermore, the university offers Hungarian language courses in autumn and spring semesters, intensive Hungarian language courses in the summer term, sport facilities (for instance: athletics, handball, basketball, football, tennis and water sports), opportunities for studying abroad and an Alumni-club for its former and current students. The various cultural and social activities on campus are organised by the Student Union. For international students, our housing agency can provide dormitories or flats if requested. These accommodations are located in the heart of Budapest and offered to students for an affordable price.

### International Opportunities

Eötvös Loránd University has international relations with universities all over the world. The university has formal agreements for co-operation and exchange with 400 universities in Europe, Asia, Africa, North and South America at an institutional or faculty level. The main areas of co-operation are joint training and research projects, joint participation in international conferences and workshops, and also the exchange of students and guest professors.

ELTE is proud to be able to present its students (not only from the Master stage but also from the Bachelor level) and staff the possibility to visit other countries and cultures in order to broaden their horizons and increase their cultural awareness. The university continues to develop and maintain international relations for the benefit of both Hungarian and foreign students. Students of ELTE can go to study at prestigious universities in Europe and the US, including University College London, the University of Cambridge, the University of Oxford, the University of Edinburgh, Harvard or Columbia University.

### University Networks and Industry Partnerships

Eötvös Loránd University has extensive relationships with institutions of higher education and international organisations all over the world both in the field of education and research. Our university is a member of major university networks such as the Coimbra Group, the Utrecht Network and the European University Association. Through these networks, ELTE is in contact with institutions such as the University of Cambridge or the University of Oxford.

In order to maintain the high quality of research and education it is essential, however, that ELTE builds an effective partnership not only with academic institutions but also with the representatives of the Hungarian and international business community. The university received financial support from IBM to establish special language laboratories. It has joint programmes with the MOL Group, strategic framework agreement with Sanofi-Aventis/Chinoin, cooperation with Magyar Telecom and a partnership with Ericsson. These partnerships provide excellent opportunities for students to get out of the classroom and apply their skills in a professional setting.

### The Capital of Hungary: Budapest

Hungary is a democratic country which is located in Central Europe. The country is a member of the European Union, the Visegrád Group and it is a Schengen state. The capital of Hungary is Budapest which is often called the "Pearl of the Danube", and it truly is a stunningly beautiful and safe place. Geography, history and human creativity have all contributed to create a city that simultaneously charms, amazes, and fascinates. Budapest is full of diversity, and so is its history.

Budapest has several world heritage sites, including the Andrassy Avenue, the Buda Castle, the Chain Bridge, the Heroes' Square, the Fishermen's Bastion, the Matthias Church and the Royal Palace. It has the second oldest underground metro system in the world, the third largest parliament building in Europe and one of the largest spa complexes on the continent, known as the Széchenyi Thermal Bath. The city has several concert halls and museums housing the finest collections of classical and modern art in Europe. On the one hand, Budapest is a bustling and lively city offering countless sport and cultural activities, but on the other hand it is an ideal place for those who wish to relax. The city offers green and tranquil open spaces and it has many inviting restaurants, cafés and bars where people can take a rest after a busy afternoon. Food and beverages are offered at a low price.

### Academic Programmes for International Students

Eötvös Loránd University offers degree programmes at undergraduate (BA/BSc), graduate (MA/MSc) as well as postgraduate (PhD) levels which do not require Hungarian proficiency. Besides the regular bachelor's and master's programmes, ELTE and its partner institutions also offer several joint programmes. These programmes are unique in the sense that they provide students an opportunity to study and conduct research abroad. Students can choose an entry university for the first year of their studies and then for the second year another European top university where they can complete their master's thesis. Graduates of our joint programmes can receive double degrees and an exceptional academic experience.

This brochure provides an overview of our programmes.
